List of contents

1 Introduction 1

1.1 Introduction of underground CO_2 storage 1

1.2 Mechanisms of CO_2 storage 6

1.3 Geologic storage options of CO_2 8

1.3.1 Saline aquifers 8

1.3.2 Depleted oil and gas reservoirs 10

1.3.3 Coal bed 12

1.3.4 Deep ocean 12

1.3.5 Deep-sea sediments 12

1.4 Risk assessment of underground CO_2 storage 14

1.4.1 Simulation of underground CO_2 storage 14

1.4.2 Monitoring technologies in the assessment of CCS risks 17

1.4.3 Engineering methods to reduce the risks of underground CO_2 storage 21

1.4.4 Uncertainty analysis for CO_2 storage 30

1.5 Methods for improving the cost-effectiveness of CO_2 storage 32

1.5.1 Enhanced industrial production with CO_2 storage 32

1.5.2 Co-injection of CO_2 with impurities 44

1.5.3 CO_2 as cushion gas for underground natural gas storage in depleted reservoirs 48

1.6 Prospects of CCS/CCUS technologies 50

1.7 Research objectives 52

1.8 Thesis outline 52

2 THM coupled geo-processes of underground CO_2 storage 55

2.1 Multiphase and multicomponent flow 55

2.1.1 Mass transport 55

2.1.2 Energy transport 58

2.2 Mechanical behavior of formation rocks 58

2.2.1 Stress and strain 58

2.2.2 Constitutive model 60

2.3 THM coupling processes 62

2.3.1 TH coupling model 63

2.3.2 TM coupling model 63

2.3.3 HM coupling model 63

2.4 THM coupling models in TOUGH2MP (TMVOC)-FLAC3D 64

2.4.1 TOUGH2MP (TMVOC) 64

2.4.2 FLAC3D 68

2.4.3 Coupling of TOUGH2MP (TMVOC) and FLAC3D 71

3 Parametric uncertainty analysis for CO_2 storage 72

3.1 Methodology 72

3.1.1 Distance correlation 72

3.1.2 Support vector regression 74

3.1.3 Working Schema 76

3.2 Simulation schemes 77

3.2.1 Generic model based on worldwide CCS projects 77

3.2.2 Simulation properties 81

3.3 Correlation of formation response with parameter uncertainty 84

3.3.1 Correlation of pressure change with parameter uncertainty 84

3.3.2 Correlation of formation deformation with parameter uncertainty 86

3.3.3 Correlation of the risk factor with the formation response 89

3.4 Surrogate model based on SVR 92

3.4.1 SVR surrogate model for formation pressure 92

3.4.2 SVR surrogate model for formation deformation 94

3.5 Application of the SVR surrogate model to sensitivity analysis 95

3.5.1 Sensitivity analysis of the formation pressure 95

3.5.2 Sensitivity analysis of the formation deformation 97

3.6 Summary 100

4 CO_2 storage with impurities associated with enhanced gas recovery in depleted gas reservoirs 101

4.1 Impurity gas related to CO_2 storage 101

4.1.1 Impurity level 101

4.1.2 Physical properties of the impurity-laden CO_2 101

4.2 Generic model based on literature study 104

4.3 Simulation schemes 105

4.3.1 Operation of dedicated for CO_2 storage 105

4.3.2 Operation of CSEGR 105

4.4 Dedicated for CO_2 storage 106

4.4.1 Effect of the gas recovery 106

4.4.2 Effect of the reservoir temperature 108

4.4.3 Effect of the residual water saturation 109

4.4.4 Chromatographic partitioning phenomenon 111

4.5 CSEGR 120

4.5.1 Effect of the injection rate 120

4.5.2 Effect of the primary gas recovery 122

4.5.3 Effect of the reservoir temperature 123

4.5.4 Effect of the residual water saturation 125

4.5.5 Effect of the threshold impurity concentration in EGR 126

4.6 Preliminary economic analysis 128

4.7 Summary 129

5 CO_2 as cushion gas for underground natural gas storage in depleted gas reservoirs 131

5.1 Simulation schemes 131

5.1.1 Geological model based on the Donghae gas reservoir in Korea 131

5.1.2 Parameters for numerical simulations..... 132

5.1.3 Operation scenarios 133

5.2 Properties and mixing behavior of the gases in the UGSR 134

5.2.1 Physical properties of the mixed gases 134

5.2.2 Spatial distribution of CO_2 and CH_4 136

5.3 Impacts of geological and engineering parameters 138

5.3.1 CO_2 fraction in the UGSR 138

5.3.2 Reservoir temperature..... 143

5.3.3 Reservoir permeability..... 145

5.3.4 Residual water saturation..... 147

5.3.5 CH_4 production rate 150

5.4 Summary 151

6 Conclusions and outlook 153
