Contents

Summary……. **1**

Zusammenfassung……..... **4**

1 General introduction……..……..... **7**

Potato late blight and its causal agent *Phytophthora infestans*…….. **7**

The "new" P. infestans *populations*……..… **8**

Late blight management in organic farming……..…..… **11**

Possible effects of late blight management strategies on P. infestans……..… **12**

Objectives and thesis outline……..……..... **14**

2 Effects of strip intercropping on late blight severity and potato tuber yields in field experiments, 2000-2002……...…..... **15**

3 Effects of cropping history and origin of seed potatoes on population structure of *Phytophthora infestans* (Mont.) *de Bary* …….……. **40**

4 Cultivar-specific adaptation of *P. infestans* isolates to different potato hosts as revealed by tests of aggressiveness……..….. **66**

5 Summarising discussion……..….. **82**

Effects of strip cropping on disease and yield……..... **82**

Phenotypic variation among and within P. infestans *populations as affected by cropping strategy and seed source*……...…… **85**

Practical considerations……...……...…. **87**

General conclusions……..…. **88**

List of references……..……...……..……..……..…..…… **89**

Anhang……....…....…….…..... **104**

Feldversuchspläne 2000-2002..... **104**

Beispiele angewandter Statistikprogramme / Outputs (SAS, POPGENE, TFPGA)..... **107**

List of conference papers…….…….…. **129**

Danksagung ……..…….. **131**

Curriculum vitae …..…….…… **133**
