Contents

1 Introduction 3

1.1 Asymmetric Catalysis Breakthrough 3

1.2 Industrial Applications of Chiral Transition-Metal Complexes 3

1.3 Privileged Ligands in Asymmetric Catalysis 7

1.4 Anionic and Neutral Ligands in Asymmetric Catalysis 8

1.5 Objectives of this Work 9

2 BOX and Zwitterionic Ligands in Asymmetric Catalysis 15

2.1 BOX ligands in Asymmetric Catalysis 15

2.1.1 General Aspects **15**

2.1.2 BOX ligands in Copper Asymmetric Catalysis **15**

2.1.2.1 Cyclopropanation **17**

2.1.2.2 Aziridination **19**

2.1.2.3 Mukaiyama Aldol Reaction **20**

2.1.2.4 Michael Reaction **21**

2.2 Zwitterionic Complexes in Asymmetric Catalysis 22

3 Characteristics of Borabox Ligands 29

3.1 Synthesis of Borabox Ligands 29

3.2 Determination of the pK_a of the Borabox Ligand 31

3.3 Crystal Structures of Borabox Ligands 33

3.3.1 Homoleptic Borabox Complexes **33**

3.3.2 Monomeric Borabox Complexes **34**

3.4 Borabox Ligands in Asymmetric Catalysis 35

3.4.1 Cyclopropanation of Olefins **36**

3.4.2 Desymmetrization of *meso*-Diols **38**

3.4.3 Kinetic Resolution of 1,2-Diols **39**

3.4.4 Allylic Substitution Reaction **42**

4 Application of the Borabox Ligands in Asymmetric Catalysis 47

4.1 Chiral Lewis Acid Catalysis of the Diels-Alder Reaction 47

4.1.1 Literature **47**

4.1.1.1 Introduction **47**

4.1.1.2 Mechanistic Aspects **48**

4.1.1.2.1 Mode of Coordination of the Lewis Acid to the Dienophile **48**

4.1.1.2.2 Regiochemistry of the Complexation of the Lewis Acid to the Dienophile **49**

4.1.1.2.3 Conformation of the Dienophile **49**

4.1.1.3 Lewis Acid Catalysts for the Enantioselective Diels-Alder Reaction **51**

4.1.1.3.1 Introduction 51

4.1.1.3.2 Lewis Acid Catalysts Derived from Privileged Ligands 51
4.1.1.3.2.1 Bis(oxazoline) ligands and Derivatives 51
4.1.1.3.2.2 Biaryl Derivatives 61
4.1.1.3.2.1 TADDOL Derivatives 63

4.1.1.3.3 Chiral Boron Lewis Acids 63

4.1.2 Diels-Alder Reaction Catalyzed by Borabox Complexes 65

4.1.2.1 Objectives 65

4.1.2.2 Initial Screening and Role of the Base 66

4.1.2.3 Conditions Screening and Results 67

4.1.2.4 α'-Hydroxy Enones as Substrates for the Diels-Alder Reaction 72

4.1.2.5 Conclusion 73

4.2 Friedel-Crafts Reaction 75

4.2.1 Literature 75

4.2.2 Results 78

4.3 Allylic Oxidation 81

4.3.1 Literature 81

4.3.2 Allylic Oxidation Catalyzed by Borabox Complexes 87

4.3.2.1 Objectives 87

4.3.2.2 Results 87

4.3.2.3 Conclusion 92

5 Application of the Borabox Ligands in Henry and Aza-Henry Reactions 95

5.1 Asymmetric Henry Reaction 95

5.1.1 Literature 95

5.1.1.1 Introduction 95

5.1.1.2 Rare Earth Metal Catalysis 96

5.1.1.3 Copper Complexes in the Asymmetric Henry Reaction 99

5.1.1.4 Zinc Complexes in the Asymmetric Henry Reaction 104

5.1.1.5 Catalytic Asymmetric Henry Reaction of Silyl Nitronates with Aldehydes 105

5.1.1.6 Asymmetric Organocatalytic Henry Reaction 107

5.1.1.7 Other Catalysts for the Asymmetric Henry Reaction 109

5.1.2 Henry Reaction Catalyzed by Borabox Ligands 109

5.1.2.1 Objectives 109

5.1.2.2 Initial Screening 109

5.1.2.3 Influence of the Amount of Base 113

5.1.2.4 Scope of the Henry Reaction with Nitromethane 115

5.1.2.5 Asymmetric Henry Reaction with Nitropropane 116

5.1.2.6 Asymmetric Henry Reaction with Nitroethane 122

5.1.2.7 Comparison of Privileged Ligands to Borabox Ligands 123

5.1.2.8 α-Keto Esters as Substrates in the Asymmetric Henry Reaction 124

5.1.2.9 Conclusion 125
5.2 Asymmetric Aza-Henry Reaction 126
5.2.1 Literature 126
5.2.2 Aza-Henry Reaction Catalyzed by Borabox Complexes 128

6 Copper (II)-Complexes of C5-Substituted Borabox Ligands as Catalysts for the Asymmetric Henry Reaction 135

6.1 Introduction 135
6.2 Synthesis of C5-Substituted Borabox Ligands 135
6.2.1 Synthesis of Phenyl C5-Substituted Borabox Ligand 15
6.2.2 Synthesis of Dialkyl C5-Substituted Borabox Ligands 136
6.2.3 Synthesis of Diaryl C5-Substituted Borabox Ligands 138
6.2.4 Synthesis of Hydroxyl-Substituted Borabox Ligand 141
6.2.5 C5-Substituted Borabox Ligands in Asymmetric Henry Reaction 143
6.3 Conclusion 145

7 Boron-Bridged Bis(oxazolines) and their Use in Copper-Catalyzed Asymmetric Reactions 147

8 Experimental 153

8.1 Analytical Methods 153
8.2 Working Techniques 154
8.3 Diels-Alder Reaction 155
8.3.1 Synthesis of Dienophiles 155
8.3.2 Synthesis of Diels-Alder Adducts 158
8.4 Friedel-Crafts Reaction 167
8.5 Henry Reaction 168
8.6 Aza-Henry Reaction 200
8.7 Synthesis of Borabox Ligands 202
8.8 Synthesis of Borabox Complexes 237

9 Appendix 241
9.1 X-Ray Crystal Structures 241

10 Bibliography 247
