Table of contents

1. Introduction 1

2. Background 3

2.1. Natural products as starting structures for small molecule development 3

2.2. The ubiquitin-proteasome system and its modulation by proteasome inhibitors 4

2.3. The natural product syringolin A 7

2.4. Previous synthetic approaches to the synthesis of syrbactin-like macrocycles 11

3. Aim of the project 15

4. Results and discussion 17

4.1. Studies towards the total synthesis of syringolins 17

4.1.1. Synthesis of syringolin B (SylB) 17

4.1.2. Synthesis of syringolin A (SylA) 20

4.1.2.1. Macrolactamization pathway 20

4.1.2.1.1. Synthesis of the β,γ-dehydrolysine building block 21

4.1.2.1.2. Synthesis of the α,β-unsaturated building block 23

4.1.2.1.3. Macrolactamization studies 23

4.1.2.2. Metathesis pathway 24

4.1.2.2.1. First approach to employ RCM in syringolin macrocycle synthesis 25

4.1.2.2.2. RCM: second approach 27

4.1.2.2.3. Establishment of a more convergent route to SylA and analogues 30

4.1.2.2.4. Convergent synthesis of SylA and SylA isomers 35

4.1.2.3. Synthesis of a saturated SylA derivative 38

4.2. Chemical biology studies with syringolins 39

4.2.1. Synthesis and use of a rhodamine-tagged syringolin A derivative Rh-SylA 39

4.2.1.1. Synthesis of Rh-SylA 39

4.2.1.2. ABPP studies with Rh-SylA with mammalian cell lysates 40

4.2.1.3. The use of Rh-SylA for plant pathogen interaction studies 44

4.2.2. Structure-activity relationships of syringolins 44

4.2.2.1. Structural determinants of potency and subsite selectivity deduced from structural and biochemical studies 44

4.2.2.2. Synthesis of a lipophilic analogue 47

4.2.2.3. Synthesis of pegylated analogues 49

4.2.2.4. Synthesis of a SylA-GlbA hybrid 52

4.3. A bicyclic hydantoin as an activity-based probe: discovery of a new GAPC inhibitor 54

5. Summary and conclusions 59

5.1. Summary and conclusions (English) 59

5.2. Zusammenfassung und Ausblick (German) 65

5.3. Résumé et conclusions (French) 71

6. Experimental Part 79

6.1. Materials, instruments and general methods for purification and analyses 79

6.2. Synthesis of syringolin B (SylB, **2**) 81

6.3. Synthesis of syringolin A (SylA, **1**) 92

7. References and Notes 165

8. Abbreviations 169

9. Curriculum Vitae 171

10. List of publications and patents 173

10.1. Publications 173

10.2. Patents 173

11. Acknowledgements 175
