I. THE ECONOMICS OF TECHNICAL CHANGE AND WERNER SOMBART 1

1 Introduction 3
1.1 Technology and Innovation in Economics 5
1.2 Werner Sombart as Social Scientist, Historian, and Philosopher 9
1.3 Sombart and the Relation between Society and Technology 13
1.4 Scientific, Economic, and Technical Change 17

2 Definitions, Theses and the Structure of this Treatise 21
2.1 Epistemological Terminology 22
2.1.1 From Hypotheses or Models to Theories (Theoretics) ---------- 24
2.1.2 Systems in Science and in Life ('Systematics') ---------- 26
2.1.3 Formal and Material Methods (Methodics) ---------- 28
2.2 Ideals, Value Judgments, Practice (Ethics in Science) 30
2.3 German Epistemology as Background 33
2.4 Further Terminological Remarks 35
2.4.1 The Science of Technology and its Objects ---------- 35
2.4.2 'Economical' Referring to both the Economy and Economics ---------- 36
2.4.3 Subdisciplines, Inter-Disciplines and their Objects ---------- 36
2.4.4 Concepts, Ideas, Ideals, and Ideologies ---------- 37
2.5 Technical as Part of Economic Change 38
2.6 On the Purpose and Scope of Technology from the Standpoint of Economics 39
2.7 Induced Technology 41
2.8 The Relation Between Economic Change and Technologic Change 42
2.9 The Exposition 44
2.10 Some Theses to Guide the Investigation 47

3 The Notion and some Histories of the Economics of Technical Change 49

3.1 The Name of the Discipline Studying Technology from the Standpoint of Economics 51

3.2 The Importance of Technical Change for Economics..... 52

3.3 Induced Innovation as a Key Concept 55

3.4 Diverging Histories of the Economics of Technical Change 57

3.4.1 Authors of the History of the Economics of Technical Change---------- 59

3.4.2 Divergence in the History of the economics of technical change ---------- 62

3.4.3 Measuring Divergence in the Economics of TC Histories ---------- 63

Table on the History of the Economics of Technical Change ---------- 64

3.5 On Theorizing in the History of the Sciences and in Technology 72

3.5.1 Divergence for Lack of Divergency: Explaining the Histories of the Economics of Technical Change ---------- 73

3.5.2 The Economics of Technical Change in statu nascendi ---------- 74

3.6 Historiographical Tâtonnement toward the Economics of Technical Change 76

3.7 Biology of Technical Change Instead of Economics of Technical Change? 80

3.8 Pure vs. Applied Disciplines: Economics and Natural Science vs. Business Administration and Technology? 81

II. PRE-20th CENTURY THOUGHTS ON SOCIETY AND TECHNOLOGY 85

4 On the Philosophy and Politics of Technical Change — From Aristotle to Adam Smith 87

4.1 In Search of the Origins of the Economics of Technical Change 87

4.1.1 Periodizing mediates between source and flow ---------- 87

4.1.2 Theory vs. History Corresponds to Revolution vs. Continuity ---------- 89

4.1.3 Human Beings are Both the Subjects and Objects of History---------- 90

4.2 Aristotle's Anticipation of the Emancipatory Effects of Technology 91

4.3 Mercantilism's Ambiguous Attitudes toward Machinery 92

4.3.1 The Political Inducement of Industry (Colbert) ---------- 93

4.3.2 Practical Success was more Important than Truth ---------- 94

4.4 Technology in Cameralism and Emerging Political Economy 95

4.4.1 Cameral Science as Public Including Economic Administration ---------- 96
4.4.2 Technological Unemployment and Governmental Intervention ---------- 97
4.4.3 Beckmann as Creator of Technology and Economics ---------- 98
4.4.4 Historians and Philosophers of Technology on J. Beckmann ---------- 100
4.4.5 Should General Technology be Part of Economics? ---------- 102
4.5 Why Classical Economics Packed Technical Change Inside a Black Box 104
4.5.1 Political Economy as the Science of the Wealth of Nations ---------- 105
4.5.2 Inducement of Technical Change as Excuse for Passing over its Specifics ---------- 106
4.5.3 The Neglect of R&D Financing or Machina ex Deo ---------- 109
4.5.4 The Invisible Hand Renders the Economics of Technical Change Superfluous ---------- 112
4.5.5 Relative Factor Productivity as Distributional, not Productive Problem ---------- 114

5 Machinery and Redundant Population (Ricardo, Malthus) 119
5.1 The Impact of Technical Change on Welfare 119
5.2 Realists and Dreamers with Regard to Mass Poverty 120
5.3 Machines as the Second Worst for Wages 121
5.4 Machinery Tapping the Wage-Fund 123
5.5 Capital as Accumulated Labor 125
5.6 International Competition as Technological Race 126
5.7 Machinery Calls for New Principles of Political Economy 130

6 Automated Machinery and the Labor Theory of Value (Marx) 133
6.1 A "Critical History of Technology" as Basis 134
6.2 Marx's Problems as Fruitful Questions 137
6.3 From Hegel to Marx *via* Technical Change 139
6.4 Dialectical or Historical Materialism as Justification to Look Inside the Black Box 142
6.5 Technological (Material) or Economic (Social) Determinism? 143
6.6 The Role of Science in Transforming Manu- into 'Machino-facture' 146
6.7 Historical and Analytical Research into Inducement 147
6.8 'Machino-facture' and the Labor Theory of Value 150
6.9 From Labor Value to Human Capital Theory 154
6.10 Compensation of Technological Unemployment? 157

6.11 From One-Sided Value to Market Price Theories 160
Table to Clarify Economic Terms 162

III. TECHNICAL CHANGE AS PART OF THE CAPITALISTIC PROCESS (SOMBART) 167

7 The Place of Technology in Sombart's Work and System 169
7.1 Marx and Sombart 171
7.2 Sombart Prefers the History of the Object to that of the Subject 176
7.3 'Techny' and Economy: the Early Sombart 179
7.4 'Techny' and Culture: the Mature Sombart 182
7.5 Taming Technology: the Late Sombart 187

8 Sombart's History of Technology: from the Autonomous Tinkerer to Automated Technical Change 191
8.1 The Inventor's Urge to Find Out as the Source of 'Techny' from Renaissance to Baroque (Early Capitalism) 194
8.2 From Empirical and Rational 'techny' to Scientific Technology 197
8.3 Technology Including Natural Sciences as Governed by Capitalism 198
8.4 The Interdependency of Discoveries and Inventions 201
8.5 The Ontology of 'techny': From Organic to Mechanic and Inorganic 203
8.6 The Social Significance of Production Becoming Non-Organic 204
8.7 How High Capitalism Directs Technical Change 206

9 Assessing (Induced) Technology 209
9.1 How Induced Technology Affects the Quantity and Quality of Life 210
9.2 Working Conditions and Technological Unemployment 215
9.3 The "Supreme Culture-Council" (SCC) to Control Technology 217
9.4 Return to Organic 'Technics' in German Socialism 224
9.5 The Impossibility to Tame the Nazi's Passion for Technology 229
9.6 'Un-Inducing' Technology 231
9.7 The Strengths and Limits of Sombart's Technology Evaluation 237

10 Understanding Sombart's Method of *Verstehen* 241
10.1 Could Sombart Settle the Quarrel on Methods? 241
10.2 How and what can we understand? 245
10.3 Can we understand an enterprise better than a tree? 251
10.3.1 Why Sombart *understands* early 'technics' but not technology ---------- 253
10.3.2 Understanding Engineers and Entrepreneurs ---------- 254
10.3.3 National Economy and the Peculiarities of the German Nation ---------- 256
10.4 Is Ordering Knowledge a Precondition for an Understanding Social Science? 260
10.5 Innovation as sorcerer's apprentice of capitalism that only God can halt 262
10.6 Materialism and Nominalism as Obstacles to Understanding 264
10.7 Technological economics implies understanding both nature and society 268
10.8 Economics is Theoretical When it is Practical 273
10.9 Understanding the economy and ordering it imply each other 277
Résumée 283

11 Bibliography on Sombart and the History of the Economics of Technical Change 287
11.1 General Abbreviations 287
11.2 List of Periodicals and their Abbreviations 288
11.3 List of Publications except W. Sombart 294
11.4 Publications by Werner Sombart 356
