Contents

1. Introduction **7**

2. Supercontinuum generation with an Erbium-doped fiber oscillator-amplifier system **11**

2.1. Passively mode-locked Erbium fiber lasers 13
2.2. Experimental setup 22
2.3. Supercontinuum generation with silica glass based photonic crystal fibers 28
2.4. Supercontinuum generation with a SF6 glass based photonic crystal fiber 36
2.5. Conclusion 44

3. Repetition rate of an Erbium fiber laser **47**

3.1. Influences on the repetition rate 49
3.2. Highly sensitive measurement of the repetition rate 56
3.3. Stabilization of the repetition rate 62
3.4. Repetition rate tuning via a free-space section 66
3.5. Conclusion 71

4. Carrier-envelope-offset frequency of an Erbium fiber laser **75**

4.1. Optical frequency comb 76
4.2. Measurement of the carrier-envelope-offset frequency 81
4.3. Stabilization of the carrier-envelope-offset frequency 88
4.4. Conclusion 92

5. Summary and outlook **95**
