Table of Contents

1 Introduction and Scope 1

2 Aspects of a Cross-Layer Design in Mobile Communication Systems 3

3 The OFDM Transmission Technique 7

3.1 Motivation and Principle of OFDM 7

3.2 Mathematical description 8

4 MIMO Techniques 13

4.1 Overview of MIMO Techniques 13

4.1.1 MIMO Multiplexing Techniques 16

4.1.2 MIMO Diversity Techniques 18

4.2 MIMO and OFDM 20

5 Considered System and Radio Channel Model 23

5.1 Communication System under Investigation 23

5.2 Radio Channel Modelling 26

5.3 Application of Cross-Layer Design to Considered System 31

5.4 Assessment Criteria 35

6 Beamforming Concepts 37

6.1 Beam Patterns 38

6.1.1 Array Design 43

6.2 Sector Coverage with Fixed Beams 48

6.3 Interference Considerations 51

6.3.1 Types of Interference 51

6.3.2 SINR Calculation 52

6.4 Selection Methods for Grids of Beams 53

7 Scheduling Concepts 57

7.1 Categorisation and Targets of Scheduling Techniques 59

7.2 Different Scheduling Techniques 61

7.2.1 Round Robin 61

7.2.2 Goodput Maximisation 62

7.2.3 Proportional Fair Scheduling 64

7.2.4 Score-based Scheduling ... 69
8 Signalling Aspects ... 71
8.1 Signalling in the Uplink ... 72
8.2 Signalling in the Downlink ... 78
8.3 Estimation of Overall Signalling Overhead ... 82
8.4 Possible Improvements for Overhead Reduction ... 84
9 Combined Scheduling and Beamforming ... 87
9.1 Adaptive Use of Fixed Beams ... 88
9.2 Adaptive Use of Dedicated Beams ... 90
10 Quantitative Analysis ... 93
10.1 Basic Simulation Assumptions and Procedure ... 93
10.2 Beamforming ... 98
10.2.1 SINR Distribution in Different Scenarios ... 98
10.2.2 Sector Coverage ... 105
10.2.3 Number of Active Beams per Grid ... 106
10.2.4 Frequency Reuse Factors ... 108
10.2.5 Spatial Oversampling ... 110
10.2.6 Different Number of Receive Antennas ... 111
10.2.7 Time Variance and Measurement Delay ... 112
10.2.8 GoB Selection Methods ... 114
10.2.9 Choice of beam patterns ... 115
10.2.10 Number of Available PHY Modes ... 116
10.2.11 Summary ... 121
10.3 Scheduling ... 122
10.3.1 Round Robin ... 122
10.3.2 Goodput Maximisation ... 124
10.3.3 Proportional Fair Scheduling ... 125
10.3.4 Score-based Scheduling ... 131
10.3.5 Summary ... 133
10.4 CSI Generation and Signalling ... 134
10.4.1 Amount of Uplink Signalling ... 134

10.4.2 Summary 138
10.5 Combined Scheduling and Beamforming 138
10.5.1 Adaptive Use of Fixed Beams 139
10.5.2 Adaptive Use of Dedicated Beams 143
10.5.3 Summary 149
11 Summary 151
12 Abbreviations and Symbols 153
12.1 Abbreviations 153
12.2 Symbols 154
13 References 161
