# Contents

**Acknowledgments** iii

**Abstract** v

**Sommario** vii

**1 Introduction** 1
- 1.1 Optimal Analgesics Administration . . . . . 2
- 1.2 Optimal Analgesics Administration in Postoperative Care . . 3
- 1.3 Optimal Analgesics Administration in Conscious Sedation . 4
- 1.4 Optimal Analgesics Administration in General Anesthesia . 6

**2 Background** 9
- 2.1 Introduction . . . . . 10
- 2.2 Drug Disposition and Action . . . . . 10
- 2.3 Modelling Drug Disposition and Action . . . . . 12
  - 2.3.1 Pharmacokinetic Modelling . . . . . 12
  - 2.3.2 Pharmacodynamic Modelling . . . . . 18

**3 Optimal Analgesics Administration during Postoperative Care** 21
- 3.1 Introduction . . . . . 22
  - 3.1.1 Postoperative Care . . . . . 22
  - 3.1.2 Problem Formulation . . . . . 22
  - 3.1.3 Aim of the Work . . . . . 23
- 3.2 The Black-box Optimization Procedure . . . . . 25

3.2.1 The Simplex Method . . . . . 26
3.2.2 The Partition Method . . . . . 28
3.2.3 The Novel Optimization Procedure . . . . . 30
3.3 The Black-box Optimization Procedure in Practice . . . . . 35
3.3.1 The Clinical Study . . . . . 35
3.3.2 The Results . . . . . 39
3.4 The Well-being Model . . . . . 42
3.4.1 Model Derivation . . . . . 43
3.4.2 Model Analysis . . . . . 54
3.4.3 The Optimal Administration . . . . . 61
3.5 The Well-being Model in Practice . . . . . 63
3.5.1 Estimation of PD and Link Model Parameters . . . . 64
3.5.2 Estimation of Interaction Parameters . . . . . 65
3.5.3 The Optimal Administration . . . . . 70

**4 Optimal Analgesics Administration during Conscious Sedation 73**
4.1 Introduction . . . . . 74
4.1.1 Conscious Sedation . . . . . 74
4.1.2 Problem Formulation . . . . . 75
4.1.3 Aim of the work . . . . . 76
4.2 State of the Art Modelling . . . . . 78
4.2.1 Gas Exchange System . . . . . 80
4.2.2 Cardiovascular Regulation . . . . . 84
4.2.3 Ventilatory Regulation . . . . . 86
4.2.4 Opioid Effect on Ventilation . . . . . 90
4.3 Model Analysis . . . . . 93
4.3.1 Model Response to $O_2$ and $CO_2$ Conditions . . . . . 94
4.3.2 Parameter Identifiability . . . . . 100
4.4 The New Model . . . . . 101
4.4.1 New Model Response to Hyperoxia . . . . . 101
4.4.2 New Drug Action Modelling . . . . . 103
4.5 Controller Design and Validation . . . . . 111
4.5.1 The Patient Simulator . . . . . 112
4.5.2 The Controller . . . . . 113
4.5.3 Modelling Disturbances . . . . . 114
4.5.4 Test of the Controller . . . . . 116

**5 Optimal Analgesics Administration during General Anesthesia 119**
5.1 Introduction . . . . . 120
5.1.1 General Anesthesia . . . . . 120
5.1.2 Problem Formulation . . . . . 120
5.1.3 Aim of the Work . . . . . 122
5.1.4 The Volunteer Study . . . . . 123
5.2 Stress-Induced MAP Variations . . . . . 126
5.2.1 MAP and the Stress Response . . . . . 126
5.2.2 Aim of the Work . . . . . 127
5.2.3 Model Identification . . . . . 130
5.2.4 Results and Discussion . . . . . 132
5.3 Stress-Induced PWA Variations . . . . . 135
5.3.1 PWA and the Stress Response . . . . . 135
5.3.2 Aim of the Work . . . . . 136
5.3.3 Preliminary Analysis . . . . . 138
5.3.4 Analysis of Variance . . . . . 142
5.3.5 Results and Discussion . . . . . 143
5.4 Principal Stress-induced Variations . . . . . 145
5.4.1 Aim of the Work . . . . . 145
5.4.2 Principal Component Analysis . . . . . 146
5.4.3 Results and Discussion . . . . . 148

**6 Main Achievements and Outlook 153**
6.1 Optimal Analgesics Administration in Postoperative Care . . 154
6.2 Optimal Analgesics Administration in Conscious Sedation . 155
6.3 Optimal Analgesics Administration in General Anesthesia . 157
