Abstract XVI

Zusammenfassung XVIII

1 Introduction 1

1.1 Motivation 1
1.1.1 Why CO_2 storage? 1
1.1.2 Why saline aquifer? 3
1.1.3 Why geological barrier integrity? 5

1.2 State of the art 5
1.2.1 Ongoing CO_2 sequestration projects 5
1.2.2 Research status 6
1.2.2.1 Analytical solutions 7
1.2.2.2 Numerical simulations 7

1.3 Objectives and structure 8
1.3.1 Objectives of this dissertation 8
1.3.2 Structure of this work 8

2 Fundamentals of hydro-mechanical coupling 9

2.1 Fundamentals of rock mechanics 9
2.1.1 Linear elasticity and Hooke's Law 10
2.1.2 Nonlinear elasticity 11

2.2 Fundamentals of multiphase flow 11
2.2.1 Darcy's law 11
2.2.2 Relative permeability 12
2.2.3 Klinkenberg's effect 13
2.2.4 Capillary pressure 14
2.2.5 CO_2 fluid properties 14
2.2.5.1 CO_2 fluid density 15
2.2.5.2 Enthalpy 15
2.2.5.3 Viscosity 16
2.2.6 Brine-CO_2 mixture 16
2.2.6.1 Density 16
2.2.6.2 Viscosity 17
2.2.6.3 Specific enthalpy 17

2.3 Fundamentals of hydro-mechanical process 18
2.3.1 Effective stress 18
2.3.2 Hydro-mechanical (HM) coupling 19
2.4 TOUGH2MP-FLAC3D simulator 20
2.4.1 FLAC3D 20
2.4.2 TOUGH2MP 20
2.4.3 TOUGH2MP-FLAC3D simulator 21
3 Hydro-Mechanical (HM) coupling concept 23
3.1 Effective mean stress dependent permeability model 24
3.1.1 Experimental methods 24
3.1.1.1 Isotropic compressional tests 24
3.1.1.2 Non-isotropic compressional test 25
3.1.2 Experimental results and permeability models 26
3.1.2.1 Experimental results 26
3.1.2.2 Effective mean stress dependent permeability model 27
3.1.3 Validation of the developed effective mean stress dependent permeability model 30
3.1.3.1 The comparison with Rutqvist porosity-permeability model 30
3.1.3.2 Nonlinear elasticity assumption 32
3.2 Effective mean stress dependent Biot's coefficient model 35
3.2.1 Experimental methods 35
3.2.2 Effective mean stress dependent Biot's coefficient model 36
3.2.3 Validation of Biot's coefficient's model 37
3.3 Implementation of the developed modes into TOUGHMP-FLAC3D code. 38
3.3.1 Implementation of developed permeability model 39
3.3.2 Implementation of developed Biot's coefficient model 39
4 Mechanical criteria for the integrity of geological barriers 40
4.1 Tensile failure 41
4.2 Shear failure 41
4.3 Inactive fault reactivity 44
5 Simulation of Hydro-Mechanical (HM) coupling geo-processes at Ketzin CO_2 storage site using the code TOUGH2MP-FLAC3D 46
5.1 Introduction of the pilot CO_2 storage project at Ketzin 46
5.1.1 Location and geological settings 46
5.1.2 CO_2 injection 48
5.2 Modeling and numerical simulation 49
5.2.1 Model setup 49
5.2.2 Initial and boundary conditions 51
5.3 Simulation results and discussion 53

5.3.1 History match 54
5.3.1.1 Comparisons of CO_2 arrival distance 54
5.3.1.2 History match of down hole pressure 55
5.3.2 Simulation results analysis 57
5.3.2.1 Verification of simulation feasibility 57
5.3.2.2 Reservoir permeability and porosity alteration 58
5.3.2.3 CO_2 plume evolution 59
5.3.2.4 Overpressure distribution 62
5.3.2.5 Stress evolution 64
5.3.2.6 Caprock integrity analysis 66
5.3.2.7 Induced ground movement 68
5.4 Summary 69
6 Sensitivity analysis 71
6.1 Parameter sensitivity analysis 71
6.1.1 Parameter selection 72
6.1.1.1 Irreducible water saturation 72
6.1.1.2 Absolute permeability 72
6.1.1.3 Salt concentration 72
6.1.1.4 Vertical/horizontal permeability ratio 73
6.1.1.5 Biot's coefficient 73
6.1.2 Parameter deviation and sensitivity analysis 73
6.1.3 Results analysis 74
6.1.3.1 CO_2 plume distribution 74
6.1.3.2 Pore pressure buildup 78
6.1.3.3 Determination of parameter impacts from sensitivity analysis 80
6.2 Scenarios sensitivity analysis 81
6.2.1 Injection scenarios 81
6.2.2 Results analysis 82
6.2.2.1 CO_2 plume distribution 82
6.2.2.2 Pore pressure buildup 83
6.3 Summary 84
7 Numerical simulation of a commercial scale CO_2 injection using a generic model 85
7.1 Basic information of the modelling 85
7.1.1 The setup of simulation model 85
7.1.2 Properties and initial conditions 87
7.1.3 CO_2 injection scenarios 89
7.2 Numerical simulations 89
7.2.1 Without fault 89
7.2.1.1 The injection phase 89
7.2.1.2 Post injection 98

7.2.2 With fault 105
7.2.2.1 Model setup 105
7.2.2.2 Results analysis 106
7.3 Simulation with the implemented Biot's coefficient model 110
7.4 Summary 112
8 Conclusions and future work 114
8.1 Conclusions 114
8.2 Future work 117
References 118
Nomenclature 126
