Acknowledgments	IX
Abstract	XI
Figures	XIII
Tables.....	XV
Abbreviations.....	XVI
1 Introduction.....	1
PART I: THEORETICAL BACKGROUND	3
2 Interpersonal Behavior in Competition.....	4
2.1 Relevant Theories on Interpersonal Behavior.....	4
2.1.1 Interpersonal Theory	4
2.1.2 Embodiment.....	6
2.1.3 Summary.....	9
2.2 Empirical Evidence on Interpersonal Behavior during Competition.....	10
2.2.1 Intrasexual Competition as a Specific Type of Competition	10
2.2.2 Influencing Factors.....	12
2.2.3 Complementarity and Competition	13
2.2.4 Nonverbal Synchrony and Competition	14
2.2.5 Summary.....	16
3 Biological Approach to Interpersonal Behavior during Competition	18
3.1 Hypothalamic-Pituitary-Gonadal Axis	18
3.2 Hypothalamic-Pituitary-Adrenocortical Axis	19
3.3 Basal and Dynamic Relationships between Hormones and Competition in Healthy Individuals	20
3.3.1 Theoretical Background	20
3.3.2 Basal Hormonal Levels and Competitive Behavior	22
3.3.3 Reactivity and Competition.....	23
3.4 Dual-Axis Effects on Interpersonal Behavior.....	26
3.5 Summary	29
4 Conclusions, Implications for Research Questions and Hypotheses.....	31

PART II: EMPIRICAL STUDIES	33
5 Nonverbal Synchrony and Complementarity in Unacquainted Same-sex Dyads: Associations with Competitive Behavior	34
5.1 Introduction	34
5.1.1 Nonverbal Synchrony	34
5.1.2 Complementarity	36
5.2 Methods	37
5.2.1 Participants	37
5.2.2 Study Design and Procedure	38
5.2.3 Interventions.....	39
5.2.3.1 Role-play	39
5.2.3.2 Competitive Version of the Cold Pressor Test.....	40
5.2.4 Measures	40
5.2.4.1 Motion Energy Analysis (MEA).....	40
5.2.4.2 Joystick Coding and Complementarity	41
5.3 Data Analysis.....	42
5.4 Results.....	43
5.4.1 Sample Characteristics	43
5.4.2 Surrogate Analyses	43
5.4.3 Comparison of Nonverbal Synchrony and Complementarity.....	45
5.4.4 Task Characteristics, Nonverbal Synchrony and Complementarity	46
5.4.5 Competitive Version of the Cold Pressor Test, Nonverbal Synchrony and Complementarity	47
5.5 Discussion	48
5.5.1 Conclusion	52
5.5.2 Practice Implications	52
6 The Dual-axis Approach to Predicting Dyadic Behavior: Does Acute Stress Moderate the Interaction between Sex Hormones and Cortisol?	53
6.1 Introduction	53
6.2 Methods	57
6.2.1 Participants	57
6.2.2 Study Design and Procedure	57
6.2.3 Interventions.....	58

6.2.3.1	Stress and Control Task.....	58
6.2.3.2	Role-play	58
6.2.4	Measures	59
6.2.4.1	Psychological Measures.....	59
6.2.4.2	Joystick Coding and Dyadic Behavior	59
6.2.4.3	Cortisol, Testosterone and Estradiol	61
6.3	Data Analyses.....	61
6.4	Results.....	63
6.4.1	Sample Characteristics and Hormonal Correlations.....	63
6.4.2	Stress Response.....	66
6.4.3	Role-play, Dominance and Friendliness.....	66
6.4.4	Analysis of Non-Independence	67
6.4.5	Acute Stress, Basal HPG and HPA Axes Levels in Relation to Dominance and Friendliness.....	67
6.4.6	Acute Stress, Changes in HPG and HPA Axes Levels in Relation to Dominance and Friendliness.....	70
6.5	Discussion	71
PART III: GENERAL DISCUSSION.....		77
7	Summary of Findings.....	78
8	Discussion and Integration of Findings	79
9	Strengths and Limitations	84
10	Implications and Directions for Future Research	86
