Contents

Kurzfassung	i
Abstract	ii
Acknowledgments	iv
Acronyms	ix
1. Introduction	1
2. Brillouin Scattering	9
2.1. Spontaneous Brillouin Scattering	10
2.2. Stimulated Brillouin Scattering	14
2.3. The Brillouin Gain	19
2.4. Polarization Dependence	21
2.5. Threshold	25
2.6. Applications	29
3. Brillouin Bandwidth Reduction	33
3.1. Pump Power Dependence	36
3.2. Multi Stage System	38
3.3. Frequency Domain Aperture	40
3.4. Superposition	42
4. Optical Spectrum Analysis	49
4.1. Operation Principle	54
4.2. Resolution and Dynamic Range Enhancement	57
4.3. Additional Utilization of a Local Oscillator	67
5. Delay and Storage of Light	75
5.1. Quasi-Light-Storage	81
5.2. Possibilities and Limits	85
5.3. Experimental Verification	88
	vii

5.4. Phase Modulated Signals	91
5.5. Storage Time Enhancement	95
5.5.1. Superposition	95
5.5.2. Multi stage system	99
5.5.3. Feedback	100
6. Frequency Comb Processing	105
6.1. THz- and mm-Wave Generation	107
6.2. Nyquist Pulse Generation	114
7. Summary and Outlook	123
Appendices	127
A. Convolution Theorem	127
B. QLS Frequency Comb Generation	131
References	137
List of Publications	153
Journals	153
Conferences	155
Patents	160
