Contents

1. Introduction.....	1
1.1. Introduction to Lithium-Ion Battery Cells.....	5
1.2. State of the Art of Battery Thermal Management.....	8
1.3. Thermal Management Concepts Considered in this Research.....	11
1.4. Goals and Novelty of this Research.....	12
1.5. Structure of this Research.....	14
Methodology	
2. Evaluation Criteria.....	15
2.1. Thermal Performance.....	15
2.2. Hydraulic Work.....	18
2.3. Vehicle Suitability.....	18
2.4. Producibility and Economic Viability	19
2.5. Summary	24
3. Experimental Method	25
3.1. State of the Art	25
3.2. Analysis of a Prismatic Cell.....	28
3.3. Design and Validation of the Smart Battery Cell	34
3.4. Novelty of the Developed Method.....	37
Analysis	
4. Reference Module for the Experimental Comparison.....	39
4.1. Experimental Setup and Procedure	39
4.2. Analysis of the Reference Module	43
5. Investigation of Various Cooling Plate Designs.....	48
5.1. Layout and Considered Production Techniques.....	49
5.2. Multifactorial Analysis of Three Cooling Plates.....	56
5.3. Discussion and Design Recommendations.....	66
6. Investigation of Active Spacers.....	69
6.1. Layout and Considered Production Techniques.....	70
6.2. Multifactorial Analysis of Ceramic Spacers.....	72
6.3. Discussion and Design Recommendations.....	80

7. Investigation of Heat Pipe Spacers and Long Heat Pipes.....	82
7.1. Layout and Considered Production Techniques.....	82
7.2. Multifactorial Analysis of Heat-Pipe Spacers.....	87
7.3. Discussion and Design Recommendations.....	94
8. Inter-Concept Comparison.....	97
8.1. Use Case 1: Hot-soak at 40°C.....	97
8.2. Use Case 2: Cold-start at 0°C.....	100
8.3. Multifactorial Analysis Across Both Use Cases.....	102
8.4. Design Recommendations for a High-Performance PHEV.....	106
<hr/>	
9. Conclusion.....	107

————— **Appendices** —————

A. References.....	111
B. Abbreviations and References.....	121
C. Details of the Experimental Setup.....	123
D. Numerical Analysis of Cooling Plate Operating Conditions....	126
E. Numerical Analysis of the Ceramic Spacers.....	129
