Abstract

Contents

1	Introduction	1
1.1	Motivation.....	1
1.2	Thesis Objectives.....	2
1.3	Thesis Organization.....	3
2	Technology	4
2.1	Transferred Substrate (TS) Process Flow.....	7
2.2	InP-on-BiCMOS Process Flow.....	8
3	Device Modelling and Measurement Setup	11
3.1	Passives.....	11
3.1.1	Transmission Line Theory.....	11
3.1.1.1	Investigation of Different Transmission Lines.....	13
3.1.2	Resistors.....	14
3.1.3	Capacitors.....	15
3.1.4	Ground Via.....	16
3.1.5	Transition Between InP and BiCMOS.....	16
3.1.6	DC and High Frequency RF Pads.....	17
3.1.7	Post Layout Analysis.....	18
3.2	Active Elements.....	19
3.2.1	Small Signal and Large Signal.....	19
3.3	Measurements.....	20
3.3.1	S-parameter.....	21
3.3.2	Spectrum.....	21
3.3.3	Power.....	22
3.3.4	Oscillator Measurement Methodology.....	23
3.3.5	Multiplier Measurement Methodology.....	23
4	Millimeter Wave and Sub-THz Frequency Oscillators	24
4.1	Oscillator Circuit Topology.....	24
4.1.1	Phase Noise.....	25
4.1.2	Push-Push Topology.....	26
4.2	Oscillators on Transferred Substrate (TS) Process.....	27

4.2.1	Design and Characterization	27
4.2.1.1	96 GHz Fundamental Oscillator.....	27
4.2.1.2	200 GHz Fundamental Oscillator.....	32
4.2.1.3	290 GHz Harmonic Oscillator	35
4.3	Oscillators on InP-on-BiCMOS Process	39
4.3.1	Design and Characterization.....	40
4.3.1.1	Push-Push Oscillator Design.....	40
4.3.1.2	162 GHz Push-Push Oscillator	41
4.3.1.3	270 GHz Push-Push Oscillator.....	43
5	Sub-THz and THz Active Frequency Multipliers	46
5.1	Design Principle and Topology.....	46
5.1.1	Purpose of Active Frequency Multipliers.....	46
5.1.2	Single Device Frequency Multiplier.....	47
5.1.3	Balanced Frequency Multiplier.....	49
5.2	Design and Characterization.....	51
5.2.1	W-band Marchand Balun.....	51
5.2.2	140-220 GHz Frequency Doubler	54
5.2.3	Band Pass Filter Beyond 200 GHz.....	60
5.2.4	250 GHz Frequency Tripler.....	63
5.2.5	330 GHz Frequency Quadrupler	66
6	Hetero-Integrated Sources	71
6.1	BiCMOS-to-InP Transition	71
6.2	Design and Characterization.....	73
6.2.1	250 GHz Hetero-Integrated Source.....	73
6.2.2	330 GHz Hetero-Integrated Source.....	84
7	Conclusions	88
