Contents	ix
List of Figures	xv
List of Tables	xix
1 Introduction	1
1.1 Application Examples and Requirements	2
1.1.1 Anti-Spoofing for Face Recognition	3
1.1.2 Other Applications	5
1.2 Contributions	5
1.3 Outline	7
2 Fundamentals	9
2.1 Terminology and Notation	9
2.1.1 Mathematical Notation	9
2.1.2 Multispectral and Hyperspectral Imaging	9
2.1.3 Simultaneous and Field-Sequential Waveband Capturing	10
2.2 Physical Basis of SWIR Skin Detection	13
2.3 SWIR Imaging Technology	15
2.4 Chromatic Aberration in Optical Systems	17
2.5 Motion Estimation and Optical Flow	18

2.6	Machine Learning Methods for Data Classification	20
2.6.1	Binary Decision and Model Trees	20
2.6.2	Random Forests	21
2.6.3	Support Vector Machines	22
2.6.4	Evaluation of Classification Performance	24
2.7	Face Recognition	25
2.7.1	Categorization and Processing Flow	25
2.7.2	Overview of Techniques and Approaches	27
2.7.3	Face Matching Between SWIR and VIS Images	28
3	Concept of a Skin-Detecting SWIR Camera System	29
3.1	Design Goals	29
3.2	Related Work	30
3.2.1	Imaging and Non-Imaging Skin Detection	30
3.2.2	Motion Compensation	34
3.2.3	Face Verification and Anti-Spoofing	36
3.3	Reference Design and Methodology	39
4	Motion Compensation for Field-Sequential Imaging Systems	41
4.1	Introduction	41
4.2	General Concepts to FSWC Motion Compensation	42
4.2.1	Inter-Frame Interpolation (IFI)	45
4.2.2	Inter-Channel Matching (ICM)	47
4.2.3	Combining ICM and IFI	49
4.3	Handling Inconsistent Intensities	49
4.3.1	Intensity Normalization	49
4.3.2	Intensity Transformation	50
4.3.3	Correlation Based Methods	51

CONTENTS **xi**

4.4	Extended Cost Function (ECF) for Block Matching	55
4.5	Pixelwise Artifact Correction (PAC)	55
4.6	Summary	56
5	Skin Detection and Face Verification	57
5.1	Introduction	57
5.2	Skin Classification Based on Spectral Signatures	58
5.2.1	Thresholding on Multidimensional Normalized Differences	58
5.2.2	Classification with Machine Learning Techniques	59
5.3	Combining Skin Detection and Face Verification	61
5.3.1	Masking Out Non-Skin Pixels	64
5.3.2	Generic Regions of Interest (ROIs)	64
5.4	Summary	68
6	System Design	69
6.1	Camera System Setup	69
6.2	Implementation Details	71
6.2.1	SWIR Camera	71
6.2.2	Microcontroller System	73
6.2.3	Waveband Selection	75
6.2.4	Design of the Illumination Module	76
6.2.5	PC-based Control and Analysis Software	81
6.3	Image Processing	82
6.3.1	Fixed Pattern Noise Correction	82
6.3.2	Motion Compensation	85
6.3.3	Camera and Ring Light Calibration	85
6.4	Image Analysis	86
6.5	Eye Safety Evaluation	86

6.6	Depth from Chromatic Aberration	89
6.7	Summary	92
7	Concept Validation	95
7.1	System Evaluation	95
7.1.1	Calibration Results	96
7.1.2	Influence of Ambient Light	98
7.1.3	Operation Range	99
7.2	Evaluation of Motion Compensation Performance	100
7.2.1	Evaluation Setup	101
7.2.2	Quality Measures	104
7.2.3	Performance Ranking	105
7.2.4	Influence of Low-Intensity Reference Channels	113
7.3	Distance Estimation Accuracy	114
7.4	Evaluation of Skin Detection Performance	116
7.4.1	Study Design	116
7.4.2	Data Analysis	117
7.5	Evaluation of Face Anti-Spoofing	120
7.5.1	Dataset and Test Design	121
7.5.2	Classification Accuracy	123
7.5.3	False Rejection Rate	124
7.5.4	Spoof Detection and False Acceptance Rate	125
7.6	Summary	130
8	Conclusions and Outlook	133
8.1	Summary	133
8.2	Outlook to Other Applications	136

CONTENTS	xiii
A Hardware Documentation	139
A.1 Camera Specifications	139
A.2 LED Specifications	140
A.3 Ring Light and Embedded System Design	141
B Software Documentation	147
B.1 Software Design	147
B.2 Libraries and Tools	147
C Datasets	151
C.1 FSWC Optical Flow Database	151
C.2 Skin/Face Database	151
C.3 Spoofing Attack Database	154
