

Palina Moleva (Autor)

**Explaining and evaluating price volatility and price levels in
world agricultural markets**
A vector autoregressive approach

Outline

Figures.....	XIV
Tables.....	XVIII
Abbreviations.....	XIX
1. Introduction	1
1.1. Problem statement and objectives of the thesis	1
1.2. Structure of the thesis and limitations.....	4
2. Development of international markets for agricultural commodities, biofuels and of food security	6
2.1. Development of price levels.....	6
2.2. Price volatilities on international markets.....	11
2.2.1. Definition and measurement of price volatility	11
2.2.2. Own estimations of price volatilities across time and commodities.....	15
2.3. International biofuel markets and feedstocks.....	19
2.4. Development of the world food situation.....	25
2.5. Interim conclusions: correlation versus causality	28
3. Theoretical analyses and empirical findings of price formation and price developments on international agricultural markets	31
3.1. The treadmill theory as a starting point.....	31
3.2. Additional partial explanatory factors for short-term and medium-term price movements	35
3.2.1. Demand-side triggers	35
3.2.2. Supply-side triggers	38
3.2.3. Macroeconomic and intersectoral triggers.....	39
3.2.4. Trade policy effects.....	41
3.3. A brief literature survey on the effects of biofuels and speculation	42
3.3.1. Price effects of biofuels.....	42
3.3.2. Price effects of speculation	46

3.4. The weaknesses of the partial explanatory approach when several shocks occur simultaneously	47
3.4.1. A macroeconomic example.....	48
3.4.2. A sectoral example.....	49
3.5. Excursus: on the question of price transmission and of hunger caused by high and volatile prices	51
3.5.1. Relationship between prices and hunger.....	51
3.5.2. Literature survey on price transmission elasticities.....	53
3.5.3. Own estimations with a vector error correction model.....	56
3.5.4. Home-made determinants of hunger.....	58
3.6. Interim conclusions concerning the choice of the own empirical analysis.....	60
4. Multivariate time series analysis as chosen methodology.....	61
4.1. Vector autoregressive models – VARs and SVARs.....	61
4.1.1. Identification problem and structural VAR model	64
4.1.2. Impulse Response Functions.....	70
4.1.3. Variance Decomposition.....	73
4.2. Unit-roots and stationarity issues	74
4.3. Granger causality test and cointegration.....	78
4.4. Estimation procedure	82
4.4.1. Data transformation.....	82
4.4.2. Model stability and lag length specification.....	83
4.4.3. Testing serial correlation.....	85
5. Empirical analysis using a structural VAR model	87
5.1. Literature review on (S)VAR analyses	87
5.2. Data description of the used time series.....	95
5.3. Testing and modelling the VAR system	107
5.3.1. Unit-root test	107
5.3.2. Structural breakpoint test	111
5.3.3. Construction of the main SVAR model.....	112

5.3.4. Granger causality test.....	113
5.4. Identification of contemporaneous restrictions in a SVAR context	115
5.5. Presentation and discussion of empirical results using different variables’ combinations	118
5.5.1. SVAR 1 with 5 variables	119
5.5.2. SVAR 2 with 5 variables	122
5.5.3. SVAR 3 with 5 variables	124
5.5.4. SVAR 4 with 5 variables	126
5.5.5. SVAR 5 with 6 variables	129
5.5.6. SVAR 6 with 6 variables	131
5.5.7. SVAR 7 with 7 variables	134
5.5.8. SVAR 8 with 7 variables	136
5.6. Interim conclusion on the empirical results	138
6. Summary and conclusion of the thesis	142
6.1. Background and market overview	142
6.2. Price analysis and methodology.....	144
6.3. Empirical Findings	146
6.4. Policy implications.....	148
7. Zusammenfassung und Fazit der Arbeit.....	151
7.1. Problemstellung und Marktüberblick.....	151
7.2. Preisanalyse und Methodenwahl.....	153
7.3. Empirische Ergebnisse	155
7.4. Politikimplikationen.....	157
References.....	161
Appendix I	177
Appendix II	179
Appendix III.....	187
Appendix IV.....	189
