List of Symbols	xix
1 Introduction	1
1.1 Background	1
1.2 Motivation	2
1.3 Outline	3
2 Theoretical Background	5
2.1 Basic Equations	5
2.1.1 Reynolds Transport Theorem	6
2.1.2 Conservation Equations	6
2.2 Multiphase Flow	7
2.2.1 Surface Tension	7
2.2.2 Contact Angle	9
2.2.3 Stable Free Surface Under Varying Gravity Conditions	9
2.2.4 Free surface reorientation	10
2.2.5 Damping	11
2.3 Heat Transfer	12
2.3.1 Conduction	12
2.3.2 Convection	12
2.3.3 Radiation	12
2.4 Phase Change	13
2.5 Numerical Implementation	14

2.6	Cryogenic Liquids	14
3	State of Research	15
3.1	Experimental Investigations of the Free Surface	15
3.1.1	Isothermal Experiments	15
3.1.2	Non-Isothermal Experiments	16
3.2	Numerical Investigations of the Free Surface	18
3.2.1	Isothermal Computations	18
3.2.2	Non-Isothermal Computations	19
4	Mathematical Model	21
4.1	Coordinate Systems	21
4.2	Governing Equations	23
4.2.1	Mass Conservation	23
4.2.2	Momentum Conservation	24
4.2.3	Energy Conservation	24
4.2.4	Relations for Pressure and Internal Energy	25
4.3	Cartesian Coordinates	25
4.3.1	Mass Conservation	26
4.3.2	Momentum Conservation	26
4.3.3	Energy Conservation	27
4.4	Cylindrical Coordinates	28
4.4.1	Mass Conservation	28
4.4.2	Momentum Conservation	28
4.4.3	Energy Conservation	30
4.5	Boundary Conditions	30
4.5.1	Fluid-Solid Interface	31
4.5.2	Liquid-Vapor Interface	31
5	Numerical Model	35
5.1	Numerical Model in Flow-3D	35

5.1.1	Mass Conservation	36
5.1.2	Momentum Conservation	36
5.1.3	Energy Conservation	37
5.1.4	Relations for Pressure, Internal Energy and Multiphase Flow	38
5.1.5	Boundary Conditions	38
5.2	Numerical Model in Fluent	40
5.2.1	Mass Conservation	41
5.2.2	Momentum Conservation	41
5.2.3	Energy Conservation	42
5.2.4	Relations for Pressure, Internal Energy and Multiphase Flow	43
5.2.5	Boundary Conditions	44
5.3	Solver Theory	45
5.3.1	Flow-3D	46
5.3.2	Fluent	47
6	Drop Tower Experiments	53
6.1	Parahydrogen Drop Tower Experiments	54
6.1.1	Experimental Apparatus	54
6.1.2	Temperature and Pressure Sensors	56
6.1.3	Heating Elements	56
6.1.4	Visual Detection	57
6.1.5	Material Properties	59
6.1.6	Experiment Preparation	59
6.1.7	Preparation of the Isothermal Experiment A5	63
6.1.8	Preparation of the Non-Isothermal Experiment B6	64
6.2	Numerical Simulation of Reorientation and Axial Sloshing	65
6.2.1	Geometry Simplifications	65
6.2.2	Mesh Generation and Boundary Conditions	66
6.2.3	Material Properties	68
6.2.4	Initial Conditions	69

6.2.5	Numerical Settings	72
7	Sounding Rocket Experiment	73
7.1	SOURCE-II Sounding Rocket Experiment	73
7.1.1	Experimental Apparatus	73
7.1.2	Visual Detection, Temperature and Pressure Sensors	74
7.1.3	Material Properties	75
7.1.4	Experiment Procedure	76
7.2	Numerical Simulation of the Suborbital Flight Experiment	77
7.2.1	Geometry Simplifications	77
7.2.2	Mesh Generation and Boundary Conditions	78
7.2.3	Material Properties	83
7.2.4	Initial Conditions	83
7.2.5	Procedure	85
7.2.6	Numerical Settings	86
8	Results	89
8.1	Drop Tower Experiments and Simulations	89
8.1.1	Computational Performance	90
8.1.2	Initial Free Surface	93
8.1.3	Initial Capillary Rise	93
8.1.4	Isothermal Conditions	95
8.1.5	Non-Isothermal Conditions without Boiling	101
8.1.6	Global Free Surface Behavior	108
8.1.7	Pressure Progression	116
8.2	Simulations of the SOURCE-II Experiment	118
8.2.1	Computational Performance	118
8.2.2	Mass Flux over the Free Surface	123
8.2.3	Contact Angle in Presence of Local Wall Superheat	129

<i>CONTENTS</i>	xvii
9 Conclusion and Outlook	135
9.1 Conclusion	135
9.1.1 Drop Tower Experiments	135
9.1.2 Sounding Rocket Experiment	137
9.2 Outlook	139
A Appendix	141
A.1 Material Properties	141
A.2 Drop Tower Experiments	144
A.2.1 Temperature Sensor Locations	144
A.2.2 Correction Functions for Surface Extraction	144
A.2.3 Error Estimation for Center Point Detection of Spherical Surfaces	145
A.2.4 Initial Wall and Vapor Temperature Distribution for the Simulations	147
A.2.5 Local Minima and Maxima of the Center Point	149
A.3 Simulations of the SOURCE-II Experiment	151
A.3.1 Initial Temperature Distribution for the Simulations	151
A.3.2 Instability in Simulation Mesh1 with Flow-3D	151
A.3.3 Apparent Contact Angle with Respect to the Wall Superheat	153
List of Figures	155
List of Tables	162
Bibliography	166
