Table of Contents

List of Tables	ix
List of Figures	xi
List of Abbreviations	xiii
Summary	xiv
Zusammenfassung	xv
1. Introduction	1
1.1 Background information and problem statement	1
1.2 Research questions	3
1.3 Research objectives	3
1.4 Structure of the thesis	4
2. Context of farming in the Ukrainian Carpathians	7
2.1 Farming in marginal areas	7
2.2 High Nature Value (HNV) farming: policy options to address agriculture in the marginal areas	11
2.3 Implications for economic situation and nature in the Ukrainian Carpathians	18
2.4 National institutional framework and relevant policies in the field of agriculture and nature conservation in Ukraine	24
2.4.1 Agricultural policy of Ukraine	24
2.4.2 Environmental policy of Ukraine	30
2.4.3 International integration and its impacts on the national policies of Ukraine	35
3. Analysing the efficiency of environmental performance: theoretical framework	38
3.1 Environmental externalities in agriculture	38
3.1.1 Theory of external effects	38
3.1.2 Theory of joint production	39
3.2 Biodiversity provision as an external effect	42
3.2.1 Definition and importance of biodiversity	42
3.2.2 Interrelation between biodiversity and agricultural activities	46
3.2.3 Biodiversity indicators	51
3.3 Evaluating the efficiency of economic and environmental performance	53
3.3.1 The setting of production economics and efficiency of performance	53
3.3.2 Concept of environmental efficiency	56
3.3.3 Measuring environmental efficiency	58
3.3.3 (i) General approach	58
3.3.3 (ii) Choice of the method for efficiency estimation	60
3.4 Limitations of the environmental efficiency approach	62
4. Research design and methodology	65

4.1	Study area and data collection	65
4.1.1	Description of the study area and study sites	65
4.1.1	(i) General information	65
4.1.1	(ii) Biodiversity.....	67
4.1.2	Empirical data collection.....	70
4.1.2	(i) Socioeconomic survey	71
4.1.2	(ii) Botanical survey	72
4.1.3	Production settings: some results of descriptive statistics	73
4.1.3	(i) Farming and grassland management.....	73
4.1.3	(ii) Biodiversity provision	85
4.1.3	(iii) Calculation of the biodiversity index.....	89
4.2	Research methodology for efficiency analysis.....	99
4.2.1	Method for efficiency evaluation – DEA approach	99
4.2.2	Empirical model	104
4.2.2	(i) General model description	104
4.2.2	(ii) Data on inputs and outputs	110
4.2.2	(iii) Detection of outliers	112
4.2.2	(iv) Estimation of optimal weights and slacks in DEA	116
4.2.3	Evaluation of inefficiency sources	119
4.2.3	(i) The model algorithm.....	119
4.2.3	(ii) Endogenous variables	121
5	Empirical results: Efficiency of economic and environmental performance	126
5.1	Economic and environmental technical efficiencies	126
5.2	Comparative analysis of economic and environmental measurements	132
5.3	Factors influencing efficiency	137
6.	Important conclusions and their implications	142
6.1	Contribution to knowledge	142
6.2	Policy implications	147
7.	References	153
	Appendix: List of plant species and their abbreviations	176
