TABLE OF CONTENTS

1. General introduction and work hypothesis	3
1.1. Introduction.....	3
1.2. Home-grown European soybean and rapeseed producing countries	4
1.2.1. Soybean production.....	4
1.2.2. Rapeseed production	5
1.3. Chemical composition of soybean and rapeseed products	6
1.4. Heat treatments of oilseed products.....	9
1.5. Feed processing and Maillard reaction products	10
1.6. Ileal crude protein and amino acid digestibility.....	12
1.6.1. Apparent ileal digestibility (AID)	12
1.6.2. Ileal endogenous losses	12
1.6.3. True ileal digestibility (TID).....	13
1.6.4. Standardized ileal digestibility (SID).....	14
1.7. Standardized ileal crude protein and amino acid digestibility in soybean and rapeseed products.....	15
1.8. Relationship between chemical composition and standardized ileal digestibility of crude protein and amino acids	16
1.9. Factors affecting standardized ileal crude protein and amino acid digestibility in low- and high-protein diets	17
1.10. Effect of supplementation of probiotics in pig diets on crude protein and amino acid digestibility	18
1.11. Work hypothesis	19
1.12. References.....	20
2. Chemical composition and standardized ileal digestibility of crude protein and amino acids in home-grown European soybean and rapeseed products fed to growing pigs.....	35
2.1. Summary	35
2.2. Introduction.....	35

2.3. Materials and methods	37
2.3.1. Animals, housing and surgical procedures.....	37
2.3.2. Experimental design, diets and procedures.....	37
2.3.3. Chemical analyses.....	40
2.3.4. Calculations.....	41
2.3.5. Statistical analysis	42
2.4. Results.....	42
2.4.1. General observations.....	42
2.4.2. Chemical composition of soybean and rapeseed products.....	42
2.4.3. Standardized ileal CP and AA digestibility coefficients in soybean and rapeseed products	46
2.5. Discussion.....	49
2.6. Conclusions.....	53
2.7. Acknowledgements.....	54
2.8. References.....	54
3. Influence of wet heating and autoclaving on chemical composition and standardized ileal crude protein and amino acid digestibility in full-fat soybeans for pigs	63
3.1. Summary.....	63
3.2. Introduction.....	64
3.3. Materials and Methods.....	64
3.3.1. Animals, housing, and surgical procedures.....	65
3.3.2. Experimental design, diets, and procedures.....	65
3.3.3. Chemical analyses.....	68
3.3.4. Calculations.....	69
3.3.5. Statistical analysis	69
3.4. Results.....	70
3.4.1. Influence of heat treatment on chemical composition of full-fat soybeans	70
3.4.2. Influence of heat treatment on standardized ileal digestibility of CP and AA of full-fat soybeans.....	72

3.4.3. Equations for predicting standardized ileal digestibility of CP and indispensable AA from chemical and physical parameters	74
3.5. Discussion	75
3.6. Acknowledgements.....	78
3.7. Literature cited.....	78
4. Effect of <i>Bacillus subtilis</i> and <i>Bacillus licheniformis</i> supplementation in diets with low- and high-protein content on ileal crude protein and amino acid digestibility, and intestinal microbiota composition of growing pigs.....	85
4.1. Summary	85
4.2. Background.....	86
4.3. Methods	87
4.3.1. Animals, housing, and surgical procedures.....	87
4.3.2. Experimental design, diets, and procedures.....	87
4.3.3. Chemical analyses.....	90
4.3.4. DNA extraction of ileal digesta and feces samples.....	90
4.3.5. Amplicon sequencing analysis.....	90
4.3.6. Quantitative real time PCR	91
4.3.7. Calculations.....	93
4.3.8. Statistical analyses	93
4.4. Results.....	94
4.5. Discussion.....	103
4.6. Conclusions.....	107
4.7. Acknowledgements.....	107
4.8. References.....	108
5. General Discussion.....	119
5.1. Influence of heat treatment on chemical composition and standardized ileal crude protein and amino acid digestibility in soybean and rapeseed products	119
5.1.1. Anti-nutritional factors.....	119
5.1.1.1. Soybean trypsin inhibitors.....	119
5.1.1.2. Rapeseed glucosinolates	120

5.1.2. Maillard reaction products	120
5.1.3. Indicators of heat treatment.....	121
5.2. Effect of fat and fiber contents on standardized ileal crude protein and amino acid digestibility	123
5.3. Effect of origin on nutritional composition and standardized ileal crude protein and amino acid digestibility in soybean and rapeseed products	124
5.4. Influence of supplementation of <i>Bacillus</i> spp. to low- and high-protein diets on ileal crude protein and amino acid digestibility.....	125
5.5. Conclusion	127
5.6. Suggestion for further research.....	127
5.7. References.....	128
6. Summary.....	139
7. Zusammenfassung	145
8. Appendix.....	151
