Abstract	i
List of Symbols, Indices, and Abbreviations	iii
1 Introduction	1
1.1 Examples for Bio-Inspiration in Engineering.....	1
1.2 Nacre, Mother-of-Pearl.....	4
1.2.1 Composition and Microstructure of Nacre.....	4
1.2.2 Mechanical Properties of Nacre.....	6
1.2.3 Mechanical Properties of the Constituents of Nacre	9
1.2.4 Deformation Mechanisms and Fracture Mechanics of Nacre	10
2 Theoretical and Practical Background	13
2.1 Mechanical Properties of Nacre-Like Structures	13
2.1.1 Related Basic Concepts of Fracture Mechanics	13
2.1.2 Selected Mechanical Models for Brick-and-Mortar-Like Composites.....	16
2.1.3 Optimized Design for Nacre-Inspired Composites.....	33
2.2 State-of-the-Art in Nacre-Inspired Materials	34
2.2.1 Coatings and Thin Films	35
2.2.2 Bulk Materials	38
2.2.3 Macroscopic Model Materials	41
2.3 State-of-the-Art in Particle Alignment	42
2.3.1 Measures to Quantify Particle Alignment.....	43
2.3.2 Methods for the Alignment of Planar Particles.....	45
2.3.3 Alignment of Planar Particles by Sedimentation Processes	46
3 Motivation and Goals of this Project	51
4 General Experimental Procedures	53
4.1 Characterization of Raw Materials.....	53
4.2 Characterization of Composition and Porosity.....	54
4.3 Characterization of Microstructure and Alignment.....	58
4.4 Characterization of Mechanical Properties in Bending	59
4.5 Determination of Toughness	60

5	Methods, Results, and Discussions	63
5.1	Materials.....	63
5.2	Gravitational Sedimentation in Polymer Solutions and Epoxy	72
5.2.1	Related Experimental Procedures	72
5.2.2	Results.....	76
5.2.3	Discussion	82
5.3	Centrifugation-Assisted Sedimentation in Epoxy	86
5.3.1	Related Experimental Procedures	87
5.3.2	Results.....	93
5.3.3	Discussion	104
5.4	Gravitational Sedimentation Followed by Sintering and Infiltration	116
5.4.1	Related Experimental Procedures and Materials Selection	117
5.4.2	Results.....	121
5.4.3	Discussion	128
5.5	Continuously Reinforced Bio-Inspired Composites	136
6	Conclusion and Future Prospects	139
7	Bibliography	143
8	Appendix	157
8.1	Shear-Lag Model for Planar Reinforcements	157
8.2	Additional Figures and Tables	165
