Table of contents

Chapter I - General Introduction	7
Oilseed rape production.....	9
Cabbage stem flea beetle.....	10
Cabbage root fly	12
Plant resistance to insects	13
Plant traits used for host selection and acceptance.....	14
Current status of insect resistance breeding	16
Objectives.....	18
References	19
Chapter II - Screening of <i>Brassica napus</i>, <i>Sinapis alba</i> and introgression lines for antixenotic resistance to oviposition by cabbage root fly (<i>Delia radicum</i> L.)	25
Abstract	27
Introduction	27
Material and Methods.....	30
Results	33
Discussion	36
References	39
Chapter III - Screening of <i>Brassica napus</i>, <i>Sinapis alba</i> and introgression lines for antibiotic resistance to cabbage root fly larvae (<i>Delia radicum</i> L.).....	43
Abstract	45
Introduction	45
Material and Methods.....	47
Results	50
Discussion	57
References	61

Table of contents

Chapter IV - Screening of *Brassica napus*, *Sinapis alba* and introgression lines for antixenotic seedling resistance to feeding by cabbage stem flea beetle (*Psylliodes chrysocephala* L.).....65

Abstract	67
Introduction	67
Material and Methods.....	70
Results	72
Discussion	79
References	84

Chapter V - Screening of *Brassica napus*, *Sinapis alba* and introgression lines for antibiotic resistance to cabbage stem flea beetle larvae (*Psylliodes chrysocephala* L.).....89

Abstract	91
Introduction	91
Material and Methods.....	93
Results	97
Discussion	104
References	108

Chapter VI – General Discussion113

Laboratory screening methods for host plant resistance	116
Response of <i>D. radicum</i> to test accessions.....	117
Response of <i>P. chrysocephala</i> to test accessions	120
The preference-performance hypothesis	124
Conclusion.....	125
References	127
