## List of tables

	<u>Page</u>
<b>Table 2.1:</b> Leaf yield and nutritional value (per 100 g fresh edible portion) of selected Kenyan African indigenous leafy vegetables (AIVs).....	5
<b>Table 2.2:</b> Postharvest losses, storability and treatments of selected Kenyan African indigenous leafy vegetables (AIVs).....	5
<b>Table 2.3:</b> Summary of studies on pre-harvest application effects of electric fields on vegetables during production.....	10
<b>Table 2.4:</b> Summary of studies on postharvest application effects of electric fields on fresh vegetables .....	11
<b>Table 2.5:</b> Summary of studies on postharvest application effects of electric fields on vegetables during processing.....	12
<b>Table 2.6:</b> Summary of studies on pre-harvest UV-C application effects on vegetables .....	15
<b>Table 2.7:</b> Summary of studies on postharvest UV-C application effects on morphology and physiology of vegetables.....	16
<b>Table 2.8:</b> Summary of studies on postharvest UV-C application and their effects on secondary metabolites and antioxidative properties of vegetables.....	18
<b>Table 2.9:</b> Summary of studies on postharvest UV-C application effects on microbiological properties of vegetables .....	19
<b>Table 3.1:</b> Sociodemographic profiles (%), as means $\pm$ standard deviations, of farmers cultivating African indigenous leafy vegetables in Kenya (n = 45 for each county)	24
<b>Table 3.2:</b> Production, harvest operations and causes of losses at harvest (%), as means $\pm$ standard deviations, of the main African indigenous leafy vegetables cultivated in Kenya (n = 45 for each county).....	26
<b>Table 3.3:</b> Seasonality, postharvest treatments, and preservation (%), as means $\pm$ standard deviations, of African indigenous leafy vegetables in Kenya (n = 45 for each county) .....	27
<b>Table 3.4:</b> Transportation and causes of losses during transportation (%), as means $\pm$ standard deviations, of African indigenous leafy vegetable in Kenya (n = 45 for each county).....	29
<b>Table 3.5:</b> Marketing and causes of market losses (%), as means $\pm$ standard deviations, of African indigenous leafy vegetables in Kenya (n = 45 for each county) .....	30
<b>Table 4.1:</b> Weather conditions during the supply chain evaluation of African nightshade leaves from the main producing counties in Kenya.....	43
<b>Table 4.2:</b> Causes of postharvest losses (%) of African nightshade leaves during supply from the main producing counties in Kenya (n = 45).....	44
<b>Table 4.3:</b> Economic loss during postharvest supply chain of African nightshade plants in Kenya.....	50
<b>Table 5.1:</b> Effect of different electrical voltages on growth of African nightshade plants.....	62
