Contents

Preface	4
Prologue – Recent Developments in Melatonin Research	5
Melatonin – Another Phytohormone?	7
Melatonin — More than Just a Pineal Hormone	14
A Short Overview of Duodenal Signaling by Melatonin	22
The Expanding Functions of Melatonin and Their Consequences to Signaling	26
The Underrated Carbonate Radical ($CO_3^{\bullet -}$) – Detoxification and Reduced Formation by Melatonin	43
Focus on the Melatonin Metabolite N^1-Acetyl-5-methoxykynuramine (AMK)	51
Melatonergic Treatment: Chronobiological Basis and Translational Problems	61
Entraining Melatonergic Pulses Instead of Long-acting Drugs: Resynchronization Rules for Depression with Circadian Etiology	68
Considering Drug Metabolism and Molecular Complexity in Drug Design	83
Contrasting Findings on Melatonin Concerning Inflammation and Glucose Tolerance — Consequences to the Development of Melatonergic Drugs	92
Mitochondrial Hormone Receptors – An Emerging Field of Signaling in the Cell's Powerhouse	97
Melatonin and MicroRNAs: An Emerging Field	105
Intercellular Communication via Exosomal and Ectosomal MicroRNAs: Facing a Jungle of Countless MicroRNAs and Targets	109
