

Marie Bergner (Autor)

Biomimetic Function of Iron Sulfur Clusters with Alternative Ligands

Model Studies Using Synthetic Analogues

Marie Bergner

**Biomimetic Function of Iron Sulfur
Clusters with Alternative Ligands:
Model Studies Using Synthetic Analogues**

Table of Contents

1 Introduction.....	1
1.1 Iron Sulfur Clusters in Nature.....	1
1.2 Iron Sulfur Cluster Biogenesis.....	2
1.3 Marcus Theory and Proton Coupled Electron Transfer.....	3
1.4 Alternative Ligands in Iron Sulfur Clusters.....	6
1.5 Iron Sulfur Clusters in Radical SAM Enzymes	8
1.6 Synthesis and Reactivity of Biomimetic Iron Sulfur Complexes	12
1.7 EPR Spectroscopy in Iron Sulfur Clusters.....	19
1.8 Mößbauer Spectroscopy in Iron Sulfur Clusters.....	21
2 Thesis Outline.....	25
3 Characterization of a Biomimetic [2Fe–2S] Cluster in its Diferric, Mixed Valent and Protonated State	27
3.1 Introduction.....	27
3.2 Synthesis and Structural Characterization of Diferric Cluster 4(NEt ₄) ₂	27
3.3 Spectroscopic Characterization of Diferric Cluster 4 ²⁻	28
3.3.1 Spectroscopy in Solid State	28
3.3.2 Spectroscopy in Solution	30
3.4 Mixed Valent Cluster 4 ³⁻	32
3.4.1 Characterization and Spectroscopy in the Solid State	32
3.4.2 Spectroscopy in Solution	35
3.5 Protonation of the Diferric and Mixed Valent Cluster.....	38
3.5.1 Protonation of the Diferric Cluster	38
3.5.2 Protonation of the Mixed Valent Cluster	42
3.6 Conclusion	44
4 Slow Isomerization in a Synthetic [2Fe–2S] Cluster.....	45
4.1 Introduction.....	45
4.2 Isomerization in MeCN-d ₃	46
4.3 Isomerization in DMF.....	52
4.4 Density Functional Theory (DFT) Calculations	55
4.5 Effect of Protonation and Cluster Redox State	57

4.6 Ligand Exchange Between Different Homoleptic [2Fe–2S] Clusters	58
4.7 Conclusion	59
5 A Structural Model System for the [2Fe–2S] Cluster in MitoNEET Proteins	61
5.1 Introduction.....	61
5.2 Synthesis and Crystallographic Characterization in the Solid State.....	61
5.3. Spectroscopy in the Solid State and in Solution	62
5.3.1 Spectroscopy in the Solid State.....	62
5.3.2 Spectroscopy in Solution	64
5.4 Mixed Valent Cluster 26³⁻ : Spectroscopy in Solid State and in Solution.....	67
5.5 Protonation of Diferric and Mixed Valent Clusters	70
5.5.1 Protonation of Diferric Cluster 26²⁻	70
5.5.2 Protonation of Mixed Valent Cluster 26³⁻	73
5.6 Conclusion	75
6 Temperature Dependent Electrochemistry in a Series of [2Fe–2S] Clusters	77
6.1 Introduction.....	77
6.2 Determination of Reaction Entropy of Electrochemical One Electron Reduction	79
6.3 Determination of Reaction Gibbs Free Energy and Enthalpy of One Electron Reduction	85
6.4 Conclusion	86
7 Proton Coupled Electron Transfer in Biomimetic Iron Sulfur Clusters	89
7.1 Introduction.....	89
7.2 Thermodynamic Square Scheme of Homoleptic Model 4²⁻	90
7.3 PCET Reactivity in Homoleptic Model 4H²⁻	91
7.4 Thermodynamic Square Scheme of MitoNEET model 26²⁻	93
7.5 Kinetics of PCET in MitoNEET Model 26²⁻	94
7.6 Comparison of Stepwise and Concerted Pathways.....	97
7.7 Conclusion	98
8 Weak Binding Interactions Between Alkali Metal Cations and Synthetic [2Fe–2S] Clusters	99
8.1 Introduction.....	99
8.2 Binding of Alkali Metal Cations to Homoleptic Cluster 4²⁻	100
8.2.1 Determination of Binding Stoichiometry with Li ⁺	100

8.2.2 Determination of Bonding Constants with Li ⁺	102
8.2.3 Effect of Li ⁺ Binding on Electrochemical Properties of 4 ²⁻	106
8.2.4 Binding of Na ⁺ to Homoleptic Cluster 4 ²⁻	106
8.3 Binding Alkali Metal Ions to Heteroleptic Cluster 26 ²⁻	108
8.4 Coordinating Alkali Metal Cations with Homoleptic Cluster 12a ²⁻	110
8.5 Conclusion	114
9 Biomimetic [2Fe–2S] Clusters in Radical Reactions.....	115
10.1 Introduction.....	115
10.2 Reactions Using Silicates as Radical Starters.....	118
10.2.1 Cluster 12a ²⁻ and Radicals Generated from Silicates	118
10.2.2 Cluster 4 ²⁻ and Benzyl Radicals Generated from Silicates.....	121
10.3 Reactivity of 12a(NEt ₄) ₂ Toward Organic Radicals Generated from DMPA	123
10.3.1 Spectroscopy in Solution	123
10.3.2 Spectroscopy in the Solid State.....	125
10.3.3 Mass Spectrometric Analysis.....	126
10.4 Reactivity of 4 ²⁻ Toward Organic Radicals Generated from DMPA.....	129
10.4.1 Spectroscopy in Solution	129
10.4.2 Spectroscopy in Solid State	131
10.4.3 Analysis of Final Reaction Products.....	132
10.5 Reactivity of a Neutral [2Fe–2S] Cluster Toward Organic Radicals Generated from DMPA	136
10.6 Conclusion	138
10 Conclusion and Perspectives.....	141
11 Experimental Section.....	147
11.1 General Considerations	147
11.2 Syntheses of Ligands and Clusters	148
11.3 Details of Cation Binding Titrations and Job Plot Experiments.....	153
11.4 Electrochemical Measurements	154
11.5 Double Mixing Stopped Flow Experiments	155
11.6 EPR Measurements.....	155
11.7 Mößbauer Measurements.....	156
11.8 X-Ray Crystallography	156
