# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Motivation . . . . .	1
1.2	General Structure of This Thesis . . . . .	5
<b>2</b>	<b>General Concept and Experimental Facilities</b>	<b>7</b>
2.1	Literature Overview on Collector Testing Procedures . . . . .	7
2.2	Basic Concept of Testing Procedures . . . . .	11
2.2.1	Quasi-Dynamic Testing QDT . . . . .	12
2.2.2	Dynamic Testing DT . . . . .	13
2.2.3	Collector Performance Parameters . . . . .	15
2.3	Evaluated Test Collectors and Their Facilities . . . . .	16
<b>3</b>	<b>Specific Aspects of the Dynamic Testing Procedure</b>	<b>21</b>
3.1	Comparison to the Current Testing Standard . . . . .	21
3.1.1	Extension of the QDT Method for LFC . . . . .	21
3.1.2	Comparison of QDT and DT Results . . . . .	22
3.2	Optimization Procedure . . . . .	24
3.2.1	Variable of the Objective Function . . . . .	25
3.2.2	Optimization Algorithm . . . . .	27
3.3	Heat Loss Equation . . . . .	28
3.3.1	Ambient Parameters . . . . .	28
3.3.2	Polynomial Order . . . . .	30
<b>4</b>	<b>Expansion to Direct Steam Generating Collectors</b>	<b>31</b>
4.1	Adaptation of the Simulation Model . . . . .	32
4.1.1	Currently Used Plug-Flow Model PFM . . . . .	32
4.1.2	Existing DSG Models in Literature . . . . .	34
4.1.3	Extended Plug-Flow Model EPFM . . . . .	36
4.1.4	SIMPLER Algorithm . . . . .	38
4.1.5	Steam Drum Model . . . . .	41
4.2	Validation of the Simulation Models . . . . .	43
4.2.1	Comparison of EPFM to SIMPLER . . . . .	43
4.2.2	Comparison of PFM to EPFM/SIMPLER . . . . .	47
4.3	Adaptation of the Evaluation Procedure . . . . .	49
4.3.1	Adaptation to Steady-State Conditions . . . . .	49
4.3.2	Adaptation to Dynamic Conditions . . . . .	51

9.1	Summary . . . . .	141
9.2	Overall Conclusions and Outlook . . . . .	143

<b>Bibliography</b>	<b>147</b>
<b>A Basics and Particularities of Line-Concentrating Solar Collectors</b>	<b>155</b>
A.1 General Characteristics . . . . .	155
A.1.1 Parabolic Trough Collectors . . . . .	155
A.1.2 Linear Fresnel Collectors . . . . .	155
A.2 Optical Properties . . . . .	156
A.2.1 Optical Efficiency . . . . .	156
A.2.2 Optical Efficiency at Normal Incidence . . . . .	158
A.2.3 IAM and its Solar Angle Definition . . . . .	158
A.3 Thermal Behavior . . . . .	164
A.3.1 Heat Loss Parameters . . . . .	164
A.3.2 Heat Transfer Fluid . . . . .	164
<b>B Further Details on Evaluated Test Collectors</b>	<b>167</b>
B.1 Exemplary Sketches of Test Facilities . . . . .	167
B.2 Measurement Instrumentation of Test Collectors . . . . .	169
<b>C Complements to the DSG Simulation Models</b>	<b>173</b>
C.1 Derivation of the PFM Equation . . . . .	173
C.2 Derivation of the EPFM Equation . . . . .	174
C.3 Main Procedure of SIMPLER . . . . .	176
C.4 Complete Discretization Equations Used in SIMPLER . . . . .	177
C.4.1 Discrete Momentum Conservation Equation . . . . .	177
C.4.2 Pressure Equation . . . . .	178
C.4.3 Pressure Correction Equation . . . . .	179
C.4.4 Discrete Energy Conservation Equation . . . . .	179
<b>D Further Results of BS Verification</b>	<b>181</b>
<b>E Uncertainty Calculation</b>	<b>185</b>
E.1 Specific Uncertainty Equations . . . . .	185
E.2 Nominal Operating Conditions for Uncertainty Calculation . . . . .	187
<b>F Complements to the Testing Strategy</b>	<b>189</b>
F.1 Supplementary Information . . . . .	189
F.2 Justification of Using Ten Forks . . . . .	189
F.3 Calculation of Reference Heat Loss Standard Deviation . . . . .	191
F.4 Extended Results . . . . .	192
<b>G Basic Characteristics of Artificial Data</b>	<b>193</b>
