# Content

<b>List of abbreviations</b> .....	4
<b>Introduction</b> .....	5-9
<b>Chapter I – Chamber experiments to determine the pollutant removal capability of indoor plants</b> .....	10
Hörmann et al. (2017): Suitability of test chambers for analyzing air pollutant removal by plants and assessing potential indoor air purification .....	11-27
Possible error sources of Bioboxes .....	28
<b>Chapter II – Uptake of indoor pollutants by plants and plant physiology upon pollutant exposure</b> .....	29-31
Hörmann et al. (2017): Assessment of filtration efficiency and physiological responses of selected plant species to indoor air pollutants (toluene and 2-ethylhexanol) under chamber conditions .....	32-47
Results on removal of volatile organic compounds compared to literature .....	48-49
<b>Chapter III – Potential value of plants in regard to indoor air quality and human health</b> .....	50-53
Hörmann et al. (submitted): Human well-being through plants – a placebo effect? .....	54-84
Limitations of plants to reduce volatile organic compounds and approaches to enhance the uptake by plants.....	85-88
Impact of plants on indoor air quality in regard to relative humidity and carbon dioxide .....	88-90
Health concerns related to plants .....	90-91
<b>Conclusion and Outlook</b> .....	92
<b>Summery</b> .....	93-94
<b>Zusammenfassung</b> .....	95-96
<b>References</b> .....	97-111
