Acknowledgements	iii
Abstract	iv
Table of contents	vi
List of figures	x
List of tables	xix
1 Introduction.....	1
1.1 Motivations and Objectives.....	1
1.2 Thesis outline	3
2 Fundamentals of a geosystem and geo-processes.....	5
2.1 Overview of a geosystem and geo-processes	5
2.2 Multiphase underground system	7
2.2.1 Basic concepts of thermodynamics.....	7
2.2.2 Thermodynamic equilibrium	9
2.2.3 Phase determination and phase change.....	13
2.2.4 Thermodynamic properties of pure fluid	17
2.2.5 Thermodynamic properties of mixture	21
2.3 Multiphase mass- and energy transport	24
2.3.1 Mass transport.....	24
2.3.2 Heat transport.....	28
2.4 Geomechanics of intact rocks.....	29
2.4.1 Stress and strain	29
2.4.2 Properties of stress and strain tensor.....	32
2.4.3 Geomechanical constitutive model	34
2.5 The behavior of fractures and fractured rock mass	37
2.6 Coupled THM/C processes in geo-reservoirs	40
2.6.1 Coupled TH-effects.....	41
2.6.2 Coupled TM-effects	41
2.6.3 Coupled TC-effects.....	42

2.6.4	Coupled HM-effects.....	43
2.6.5	Coupled HC-effects	44
2.6.6	Coupled MC-effects.....	45
2.7	Simulation of the coupled geo-processes with TOUGH2MP-FLAC3D	46
2.7.1	The coupled simulator TOUGH-FLAC	46
2.7.2	The development of TOUGH2MP-FLAC3D	49
2.7.3	Verification of the coupled simulator	51
3	CO₂ enhanced gas recovery in the Altmark gas reservoir.....	58
3.1	The concept of CO ₂ enhanced gas recovery (CO ₂ -EGR)	58
3.2	The existing equations of state related to CO ₂ in TOUGH2	61
3.3	An improved EOS for CO ₂ -CH ₄ -H ₂ O-salt system	62
3.3.1	The phase partition of CO ₂ -CH ₄ -H ₂ O system.....	63
3.3.2	Consideration of the salt	72
3.3.3	The thermodynamic properties of brine.....	78
3.3.4	Verification of the new equation of state	79
3.4	Location and geological background	85
3.5	Determination of in-situ stress	88
3.6	Rock parameterization	96
3.6.1	Laboratory experiments on drill core samples.....	96
3.6.2	Rock property correlations.....	99
3.7	Numerical simulation of CO ₂ -EGR in Altensalzwedel subfield.....	108
3.7.1	Simulation model	109
3.7.2	Simulation scenarios of CO ₂ -EGR.....	112
3.7.3	Simulation results of baseline case and discussion.....	113
3.7.4	Simulation results of variation cases and discussion	119
3.8	Summary.....	121
4	Hydraulic fracturing operation in tight geo-reservoirs	123
4.1	Reservoir stimulation and hydraulic fracturing	123
4.2	Numerical models of hydraulic fracturing	127
4.3	A modified version of TOUGH2MP-FLAC3D for hydraulic fracturing.....	131

4.3.1	Hydro-mechanical behavior of fracture elements and fracture propagation ...	132
4.3.2	Fluid flow in the fracture and proppant transport	132
4.3.3	Fluid flow in the rock formation.....	133
4.3.4	Numerical implementation.....	134
4.4	Simulation of hydraulic fracturing in different types of geo-reservoirs	136
4.4.1	Geometric model and parameters	137
4.4.2	Initial and boundary conditions	139
4.4.3	Simulation results and discussion	141
4.5	Summary.....	148
5	Induced seismicity during the geothermal energy utilization in Unterhaching.....	150
5.1	Deep geothermal energy utilization.....	150
5.2	Induced seismicity during geothermal energy utilization	154
5.3	The coupled thermo-hydro-mechanical model based on crack tensor	157
5.3.1	The equivalent continuum model for jointed rock mass.....	157
5.3.2	The hydro-mechanical coupled model.....	161
5.3.3	The thermo-mechanical coupled model.....	162
5.3.4	The derivation of fault slip tendency and microseismic events	163
5.4	Verification of the coupled model.....	164
5.4.1	Poisson's effect	164
5.4.2	Direct shear test of joint	165
5.4.3	Direct shear test of joint in two directions	166
5.4.4	Behavior of fractured rock mass during temperature change	167
5.5	Locations and Geological background.....	169
5.6	Initial state determination.....	171
5.7	Numerical simulation of geothermal energy utilization	175
5.7.1	Geometric model.....	175
5.7.2	Parameter determination	179
5.7.3	Numerical simulation of scenarios.....	181
5.7.4	Simulation with measured data.....	188

5.8 Summary	192
6 Conclusions and outlook	194
7 References	198
Appendix A The three-phase relative permeability and capillary pressure function	218
Appendix B The SRK cubic equation of state	219
