List of Tables	v
List of Figures	vi
List of Abbreviations and Acronyms	viii
1 Introduction	1
2 Analysis of peat and plastic use in horticulture	4
2.1 Environmental sustainability	4
2.1.1 Impacts of the agro-industrial sector	5
2.1.2 Peatland and climate protection	9
2.1.3 Petroleum based plastic and waste management	12
2.1.4 Cascade utilization and resource efficiency	14
2.2 Alternatives to conventional materials	15
2.2.1 Compost as peat substitute	16
2.2.2 Bio-based plastics used in horticulture	21
2.3 Summary	26
3 Environmental aspects	27
3.1 Case-specific technical solutions	27
3.2 Life Cycle Assessment	28
3.2.1 Goal and scope definition	29
3.2.2 Inventory analysis	30
3.2.3 Impact assessment	33
3.2.4 Interpretation	39
3.3 Experimental detection of GHGs	40
3.4 LCA of peat and compost	46
3.4.1 Goal and scope definition	46

3.4.2	Life cycle inventory for GHG emissions	50
3.4.3	Life cycle impact assessment	56
3.4.4	Interpretation	62
3.5	LCA of plastic pot and bio-pots	69
3.6	Environmental impacts of a potted plant	71
3.7	Summary	72
4	Economic aspects and quality assessment in horticulture	74
4.1	Cost analysis	74
4.1.1	Accounting of decision-relevant costs	76
4.2	Quality assessment in horticulture	79
4.3	Economic analysis of peat, compost, plastic pot, and bio-pot	81
4.4	Summary	83
5	Mixing problem	85
5.1	Existing approaches for optimizing resources	85
5.2	Optimization approach	92
5.3	Case study	94
5.3.1	Objective functions	94
5.3.2	Pareto optimization	100
5.3.3	Scenario analysis	101
5.4	Summary	107
6	Conclusions and outlook	109
6.1	Conclusions	109
6.2	Discussion and outlook	111
7	Summary	115
	Bibliography	117
