

Yitayal Anley Mengistu (Autor)

The effect of policy incentives and technology on sustainable land management and income of small farm households

A bioeconomic model for Anjeni area, North Western Ethiopia

Table of Contents

CHAPTER ONE	1
INTRODUCTION	1
1.1 Background.....	1
1.2 Problem Statement.....	2
1.3 Research Questions.....	3
1.4 Research Objectives.....	3
1.5 Organization of the Thesis.....	4
CHAPTER TWO.....	5
STUDY AREA, DATA SOURCES AND CHARACTERISTICS OF SAMPLE HOUSEHOLDS	5
2.1 The Study Area.....	5
2.1.1 Location, Topography and Climate	5
2.1.2 Soil Types, Erosion and Conservation	7
2.2. Data Sources	8
2.2.1 Primary Data and Survey Design.....	8
2.2.2 Sources of Secondary Data.....	11
2.3 Classification and Characteristics of Sample Households.....	11
2.3.1 Classification of Sample Households	11
2.3.2 Characteristics of Sample Households	15
CHAPTER THREE	19
AGRICULTURE, LAND DEGRADATION AND DEVELOPMENT POLICIES	19
3.1 Performance of the Agriculture Sector in Ethiopia.....	19
3.2 Land Degradation and Productivity of Agriculture.....	21
3.3 Agricultural Development Policies and Strategies: Recent Experiences and Constraints.....	22
CHAPTER FOUR.....	26
REVIEW OF APPROACHES AND METHODOLOGICAL ISSUES	26
4.1 Introduction	26
4.2 Review of Bioeconomic Models.....	27

4.3 Bioeconomic Modeling Approaches	29
4.4 Aggregation Levels in Bioeconomic Models	31
4.5 Production Function in the Context of Land Management	32
4.6 The State of Research on Land Degradation in Ethiopia	33
CHAPTER FIVE	37
MODELING PRODUCTION AND LAND MANAGEMENT DECISIONS	37
5.1 Introduction	37
5.2 Conceptual Frameworks	38
5.3 Theoretical Framework	39
5.3.1 Introduction	39
5.3.2 The Theory of Agricultural Household Model	40
5.3.3 Modeling Farm Households' Decisions Using Linear Programming	45
5.3.4 Production Decision under Risk	47
5.3.4.1 Introduction	47
5.3.4.2 Principles of Decision Making under Risk.....	47
5.3.4.3 Downside Risk Measures	49
5.3.4.4 Safety First Model.....	50
5.3.5 Positive Mathematical Programming	51
5.4. Empirical Specifications and Estimations	56
5.4.1 Objective Function.....	56
5.4.2 Crop Yield Functions.....	57
5.4.3 Resources and Constraints.....	60
5.4.4 Biophysical Processes: Soil Erosion, Conservation and Nutrient Balance	68
5.4.5 Rainfall and Yield Variability.....	73
CHAPTER SIX	76
THE EFFECT OF POLICY INCENTIVES AND TECHNOLOGY ON SUSTAINABLE LAND MANAGEMENT AND HOUSEHOLD INCOME	76
6.1 Introduction	76
6.2 Base Run of the Bioeconomic Model	77
6.3 Model Validation: Robustness Test	78
6.4 Sensitivity Analysis	80
6.5. Simulation of Policy Incentives and technology Scenarios	83
6.5.1 The Shadow Prices of Resources	83
6.5.2 The Effect of Improved Soil and Water Conservation Technologies (ISWCT).....	86
6.5.3 The Effect of Access to Fertilizer Credit.....	89
6.5.4 The Effect of High Yielding Crop Variety (HYV).....	92
6.5.5 The Combined Effects of Improved Soil and Water Conservation Technologies, Access to Fertilizer Credit and Improved Crop Variety	94
6.6 Conclusions and Policy Implications	97

CHAPTER SEVEN	100
THE USE OF IMPROVED SOIL AND WATER CONSERVATION TECHNOLOGIES	100
7.1 Introduction	100
7.2 Theoretical Framework	101
7.3 Empirical Model.....	104
7.4 Data and Variables Used in the Model	108
7.5 Results and Discussions.....	112
7.5.1 Soil and Water Conservation Practices in Anjeni Area.....	112
7.5.2 Factors Influencing the Use of Improved Soil and Water Conservation Technologies	114
7.6 Conclusions	117
CHAPTER EIGHT	119
SUMMARY, CONCLUSIONS AND POLICY IMPLICATIONS	119
8.1 Summary	119
8.2 Conclusions and Policy Implications	126
8.3 Study Limitations and Future Research	129
REFERENCES	130
APPENDICES	136
Appendix-1: Universal soil loss equation adapted to Ethiopia	136
Appendix-2: Nutrient content of eroded soil at three level of soil fertility	137
Appendix-3: Length and area covered with soil conservation measures	137
Appendix-4: Labour requirement for soil and water conservation technology	137
Appendix-5: Conversion factors used to estimate tropical live stock units (TLU).....	138
Appendix-6: Conversion factors used to estimate labour equivalent (man days)	138
Appendix- 7: Chemical and physical properties of soils in Anjeni area	138
Appendix-8: Residue to grain ratio of crops	139
Appendix-9 : Heckman selection model estimation.....	139
