

Index

1 Introduction	1
1.1 Background	1
1.2 Construction of MFC.....	2
1.3 Microorganisms on the surface of the anode.....	3
1.4 Power generation using MFC.....	5
1.5 Energy harvesting from MFC.....	8
1.6 MFC for real wastewater, manure and urine treatment	9
1.7 MFC scale up.....	10
1.8 Motivation for this work.....	11
2 Start-up behavior of MFCs with the first design	12
2.1 Experimental	12
2.1.1 Measurement of Roughness	12
2.1.2 Wastewater and COD substrate	13
2.1.3 Design of the laboratory MFC.....	13
2.1.4 Measurement of COD values	15
2.1.5 Coulombic and energy efficiency.....	16
2.2 Results and Discussion.....	17
2.2.1 Roughness for different electrode plates	17
2.2.2 Performance of single MFCs.....	17
2.2.3 Performance of roughed MFCs in series and its long term performance	19
2.2.4 Discussion of coulombic and energy efficiency.....	23
2.2.5 Performance of MFCs with $K_3Fe(CN)_6$ as catholyte.....	24
2.3 Conclusions	26
3 Continuous electricity generation of MFCs with potassium ferricyanide	27
3.1 Experimental	27
3.1.1 Wastewater and COD Substrate.....	27
3.1.2 Design of MFC.....	27
3.1.3 Measurement of COD Values.....	29
3.1.4 Measurement of power density and MFC-bottleneck identification	29
3.1.5 Preparation of $K_3Fe(CN)_6$ Solution.....	33
3.2 Results and discussion.....	33
3.2.1 Long term performance of MFC with Pt.....	33
3.2.2 Potentials of Electrodes with $K_3Fe(CN)_6$	34
3.2.3 Evaluation of long-term performance.....	36
3.2.4 Influence of oxygen on power density.....	37

3.2.5 Coulombic and energy Efficiency	39
3.2.6 Long term performance of COD degradation rate.....	40
3.3 Conclusions	41
4 Activated carbon cloth as cathode catalysts.....	43
4.1 Measurement of power density and MFC-bottleneck identification	43
4.2 Treatment of graphite felts	43
4.2.1 Treatment with Fenton's Reagent	43
4.2.2 Treatment by thermal modification	44
4.2 Results and discussion	44
4.2.1 Characterization of graphite felts treated with Fenton reagent.....	44
4.2.2 Evaluation of start-up behavior and long term performance	46
4.2.3 Characterization of ACN treated with thermal modification.....	51
4.2.4 Start-up behavior and long term performance of MFCs with thermally treated ACN-211 ..	53
4.2.5 Long term performance of COD degradation rate.....	55
4.2.6 Coulombic and Energy Efficiency.....	56
4.3 Conclusions	57
5 Graphite plus MnO₂ and MoS₂ paints as oxygen reduction cathode catalyst of MFC	60
5.1 Experimental	60
5.1.1 Wastewater and COD Substrate.....	60
5.1.2 Measurement of COD Values.....	60
5.1.3 Preparation of graphite plus MnO ₂ and graphite plus MoS ₂ paints for evaluation in laboratory scale MFCs.....	60
5.1.4 Scaling up of MFCs.....	61
5.2 Results and Discussion.....	64
5.2.1 Start-up behavior of MFCs with graphite plus MnO ₂ paint.....	64
5.2.2 Long term performance of graphite plus MnO ₂ paints with higher proportion of MnO ₂	66
5.2.3 Long term performance of graphite plus MoS ₂ paint	67
5.2.4 Performance of MFCs with different MnO ₂ /MoS ₂ mixing proportions	69
5.2.5 Coulombic and energy efficiency.....	70
5.2.6 Start-up behavior of scaled up MFCs	71
5.3 Conclusions	73
6 Effect of different MnO₂ catalysts on the performance of MFCs.....	76
6.1 Experimental	76
6.1.1 Preparation of graphite/MnO ₂ and graphite/MoS ₂ composite.....	76
6.1.2 Characterization.....	77
6.2 Results and Discussions	78
6.2.1 Characterization of MnO ₂ and MoS ₂	78
6.2.2 Polarization curves of MFC with different catalysts	80
6.2.3 Long term performance of MFC fabricated with a catalyst prepared by different proportions..	85
6.3 Conclusions	87

7 Graphite plus Co₃O₄ paints as oxygen reduction cathode catalyst of MFC by using different forms of TiO₂.....	89
7.1 Experimental	89
7.1.1 Synthesis of Co ₃ O ₄ catalyst	89
7.1.2 Preparation of cathode with Co ₃ O ₄ catalyst.....	89
7.2. Results and Discussion	90
7.2.1 Characterization of supports and catalysts.....	90
7.2.2 Performance of Co ₃ O ₄ catalysts with different supports	94
7.2.3 Elemental analysis	96
7.3 Conclusions	97
8 Co₃O₄ as catalyst of MFC	99
8.1 Characterization of Co ₃ O ₄ catalyst	99
8.2 Performance of Co ₃ O ₄ catalyst	100
8.3 Conclusions	102
9 Scaling up of MFC for industrial use	103
9.1 Conductivity measurement of anode plates	103
9.2 Results of conductivity measurement.....	105
9.3 Coating process on the surface of cathode by using spray machine.....	106
10 Summary	109
Publications.....	112
List of abbreviations.....	114
List of symbols.....	116
References	117
