# Contents

1 Introduction ........................................... 1
   1.1 Motivation .................................. 1
   1.2 Standards for Safety ....................... 5
   1.3 Real-Time Traffic Properties .......... 7
   1.4 Requirements of Safety-critical Embedded Systems 10
   1.5 Research Objective and Contribution 14

2 Networks-on-Chip .................................. 17
   2.1 Network-on-Chip Basics ................. 17
      2.1.1 Topology ............................. 19
      2.1.2 Routing ................................ 22
      2.1.3 Switching ............................. 23
      2.1.4 Virtual Channels ..................... 25
      2.1.5 Flow Control .......................... 26
      2.1.6 Baseline Switch Architecture ....... 27
   2.2 Selected NoC Architectures ............... 30
   2.3 NoC Performance Verification .......... 41

3 Formal Performance Verification of NoCs .......... 45
   3.1 Introduction ................................ 46
   3.2 Related Work .............................. 48
5  NoC Architecture Supporting a Control-layer  
5.1  Introduction  
5.2  Requirements  
5.3  Architecture Details  
5.3.1  Virtual or Physical Control Layer  
5.3.2  Data Transport Layer  
5.3.3  Control Transport Layer  
5.3.4  Network Interface  
5.4  Summary  
6  Evaluation  
6.1  Simulation Framework  
6.1.1  QoS Schemes  
6.1.2  Use case  
6.2  Performance Results  
6.3  Synthesis Results  
6.4  Evaluation Against Requirements  
6.5  Summary  
7  Conclusion  
7.1  Concepts Extending the QoS Control Layer  
7.1.1  Quality of Service in the Data Layer  
7.1.2  Monitoring  
7.1.3  Power  
7.1.4  Errors  
7.1.5  Debug and Testing  
A  Appendix: Publications  
A.1  Related Publications  
A.1.1  Reviewed  
A.1.2  Unreviewed  
A.2  Unrelated Publications
