

Table of Contents

Tables	XI
Figures	XII
Abbreviation	XIV
Summary	XIX
Zusammenfassung	XXI
1. Introduction	1
1.1. Plant Defense Strategies.....	1
1.2. Induced Innate Immunity against Herbivore Attacks.....	3
1.3. Herbivore- and Wound-Induced Defense Responses in Tomato.....	7
1.3.1. Discovery of Systemin.....	8
1.4. Systemin Signaling Pathway.....	10
1.5. Applications of Phosphoproteomics in Studying Plant Signaling Pathways.....	15
1.6. Aims of this work.....	17
2. Materials and Methods	19
2.1. Materials.....	19
2.1.1. Chemicals and Consumables.....	19
2.1.2. Enzymes.....	19
2.1.3. Antibiotics.....	19
2.1.4. Chemicals used for Plant Tissue Culture.....	20
2.1.5. Other Chemicals.....	20
2.1.6. Media.....	21
2.1.6.1. Bacterial Media.....	21
2.1.6.2. <i>S. peruvianum</i> Media.....	21

2.1.6.3.	Media for Tomato Transformation.....	22
2.1.7.	Peptides.....	22
2.1.8.	Primers.....	23
2.1.9.	Vectors.....	32
2.1.10.	Constructs.....	33
2.1.10.1.	Design of CRISPR/Cas9 Constructs Targeting RLK Genes.....	33
2.1.10.2.	MPK2, PLL5 Phosphatase Domain and GHR1 Intracellular Domain Expression Constructs.....	35
2.2.	Organisms.....	36
2.2.1.	Bacterial Strains.....	36
2.2.2.	Bacterial Stocks.....	37
2.2.3.	<i>Solanum lycopersicum</i>	38
2.2.4.	<i>Solanum peruvianum</i>	39
2.3.	Molecular Biology Methods.....	39
2.3.1.	Isolation of Genomic DNA from Tomato Leaves or <i>S. peruvianum</i> Cells.....	39
2.3.2.	Standard-Polymerase Chain Reaction (PCR).....	40
2.3.3.	DNA Agarose Gel Electrophoresis.....	40
2.3.4.	DNA Native Polyacrylamide Gel Electrophoresis (PAGE).....	41
2.3.5.	Elution of DNA Fragments from Agarose Gel.....	42
2.3.6.	Restriction Digestion.....	42
2.3.7.	Dephosphorylation of DNA Fragments.....	43
2.3.8.	DNA Ligation.....	43
2.3.9.	Golden Gate Cloning of CRISPR/Cas9 Constructs.....	43
2.3.10.	TOPO® Cloning.....	44
2.3.11.	Transformation of Electrocompetent <i>E. coli</i> and <i>A. tumefaciens</i> 44	

2.3.12. Transformation of Chemically Competent <i>E. coli</i>	45
2.3.13. Colony PCR.....	45
2.3.14. Bacterial Cultures.....	45
2.3.15. Plasmid DNA Isolation (Mini-Preparation) from <i>E. coli</i>	46
2.3.16. DNA Sequencing.....	46
2.3.17. Isolation of RNA from Tomato Leaves.....	47
2.3.18. Reverse Transcriptase Reaction (cDNA Synthesis).....	47
2.3.19. Quantitative Real-time PCR (qRT-PCR).....	48
2.4. Protein Biochemical Methods.....	49
2.4.1. Expression of Recombinant 6xHis-tagged MPK2 (WT and CA forms), PLL5 PD, and GHR1 ID in <i>E. coli</i>	49
2.4.2. Affinity Purification of Recombinant 6xHis-tagged MPK2 (WT and CA), PLL5 PD and GHR1 ID on Ni ²⁺ -NTA Agarose.....	49
2.4.3. Dialysis of the Purified Recombinant 6xHis-tagged MPK2 (WT and CA), PLL5 PD, and GHR1 ID.....	50
2.4.4. Protein Concentration Measurement.....	51
2.4.5. SDS-PAGE.....	51
2.4.6. Western Blot.....	52
2.4.7. <i>In vitro</i> Kinase Assay.....	52
2.4.8. <i>In vitro</i> Phosphatase Assay.....	53
2.4.9. Extraction of the Microsomal Membrane Fraction from <i>S. peruvianum</i> Cells.....	54
2.4.10. <i>In vitro</i> PM H ⁺ -ATPase Activity Assay.....	54
2.4.11. In Solution Trypsin Digestion of Microsomal Proteins.....	55
2.4.12. Phosphopeptide Enrichment.....	55
2.4.13. Peptide Desalting over C18-Stage Tips.....	56
2.4.14. Liquid Chromatography Tandem Mass Spectrometry (LC-MS/MS).....	56

2.5.	Mass Spectrometric Data Analysis and Statistics for the Systemin Phosphoproteomics Analysis.....	57
2.6.	<i>A. tumefaciens</i> -mediated Transformation of Tomato Plants.....	58
2.7.	Detection of the Expression Level of Candidate RLKs after Wounding.....	59
2.8.	Detection of <i>PI-II</i> Expression in RLK Knocked-out Tomato Plants after Wounding.....	60
2.9.	Transformation of <i>S. peruvianum</i> Cells by Particle Bombardment.....	60
2.10.	Alkalization Response of <i>S. peruvianum</i> Cell Suspension Cultures.....	61
2.11.	Detection of Stomatal Movement in <i>ghr1</i> T ₂ lines in Response to Wounding.....	62
2.12.	Statistics.....	62
3.	Results	63
3.1.	Phosphoproteomics Analysis of the Microsomal Membrane Protein Fraction of Systemin-treated <i>S. peruvianum</i> Cell Suspensions.....	63
3.1.1.	Choice of Controls.....	63
3.1.2.	Experimental Design.....	64
3.1.3.	Description of the Phosphoproteomics Data Set.....	65
3.1.4.	Phosphorylation Time Profiles.....	67
3.1.5.	Verification of the Phosphorylation Time Profiles Upon Different Treatments.....	69
3.1.6.	Processes Involved in the Systemin Response.....	71
3.1.7.	Filtering Out Systemin-specific Responses.....	73
3.1.8.	Kinases and Phosphatases Specifically Induced by Systemin.....	75
3.2.	Correlation of Systemin-Specific Kinases and Phosphatases with Major Elements of the Systemin Signaling Pathway.....	78
3.2.1.	Plasma Membrane H ⁺ -ATPases.....	78
3.2.1.1.	Expression and Purification of PLL5 Phosphatase Domain and MPK2 Protein.....	80
3.2.1.2.	PLL5 Phosphatase and MPK2 Kinase <i>in vitro</i> Assays... ..	82

3.2.2. Respiratory Burst Oxidase Homologs (RBOHs).....	86
3.2.3. Processes at the Cell Wall.....	88
3.2.4. Vesicle Trafficking and G-proteins Signaling.....	89
3.2.5. Calcium-related Responses.....	90
3.2.6. Transcription Factors.....	90
3.2.7. Interactions with other Phytohormone Signaling Pathways.....	91
3.2.8. Receptor-like Kinases Induced Upon Systemin Stimulation.....	91
3.3. RLK Loss of Function Analysis.....	97
3.3.1. Characterization of <i>S. peruvianum</i> RLK Knocked-out Cell Cultures.....	97
3.3.2. Response of <i>S. peruvianum</i> RLK loss-of-function (KO) Cell Cultures to Systemin.....	97
3.3.3. Characterization of RLK Loss of Function in Gene-edited Tomato Plants.....	99
3.3.4. Wound Response of RLK Knock-out Tomato Plants.....	99
4. Discussion.....	103
4.1. The Use of the Inactive Analog A17 to Define Systemin-specific Responses.....	104
4.2. Systemin Specifically Induced Intracellular Events, Kinases and Phosphatases.....	105
4.2.1. Systemin-induced Modulation of the PM H ⁺ -ATPase (LHA1)..	107
4.2.2. Systemin-induced Modulation of RBOHs.....	109
4.3. RLKs Involved in Systemin Perception.....	110
4.4. PSKR2 is Important for Systemin Signal Transduction and Phytosulfokine Attenuates the Wound-Induced Defense Response.....	111
4.5. Involvement of ABA in Systemin and Wound Signaling Pathway through LRK10L1.2.....	114
4.6. Systemin Triggers Stomatal Closure through GHR1 Regulation.....	116

4.7.	LYK4 and the Uncharacterized LRRXIV RLK are not Involved in Systemin Signaling Pathway.....	118
4.8.	Conclusion and Outlook.....	119
5.	Bibliography	121
6.	Appendix	147
6.1.	Appendix A.1 Phosphopeptides List.....	147
6.2.	Appendix A.2 <i>k</i> -means Clusters.....	147
6.3.	Appendix A.3 Overrepresented Systemin-specific Functional Categories	148
6.4.	Appendix A.4 Distribution of Systemin-Specific Overrepresented Functional Categories Phosphopeptides in the A17 Response Shift Groups	151
6.5.	Appendix A.5 List of Systemin-specifically Induced Kinases and Phosphatases.....	153
6.6.	Appendix A.6 Pearson Correlation Analysis for Systemin-Specific Kinases and Phosphatases	153
6.7.	Appendix A.7 Mass Spectrometry Analysis of in vitro Kinase and Phosphatase Assays	154
6.8.	Appendix A.8 List of all RLKs Identified in the Data Set	155
6.9.	Appendix A.9 List of Mutations Identified in the RLK KO <i>S. peruvianum</i> Cell Culture	156
6.10.	Appendix A.10 List of Mutations Identified in T1 RLK Mutated Tomato Lines.....	160
7.	Declaration	161
8.	Acknowledgement	162
9.	Curriculum Vitae	163
