Abstract	1
Kurzfassung	3
1 Introduction	5
2 The Rosetta Mission	7
2.1 Rosetta Overview	7
2.2 Overview of the Philae Landing	9
2.3 Comet 67P/Churyumov–Gerasimenko	10
2.4 The Rosetta Spacecraft	12
2.5 The Philae Lander	14
2.5.1 Lander Design	15
2.5.2 The ROMAP Instrument	20
3 Magnetic Field around 67P/Churyumov–Gerasimenko	23
3.1 Cometary Plasma Environment	23
3.2 Low Frequency Magnetic Waves	25
3.2.1 Two-Point Low Frequency Wave Observations	26
3.2.2 Spectral Analysis	29
3.2.3 Wave Orientation and Phase Velocity	34
3.3 Magnetic Field Attitude Determination	37
4 Philae Flight Reconstruction	41
4.1 Descent Overview	42
4.2 First Touchdown	45
4.3 Rebound	48
4.3.1 Collision	48
4.3.2 Second Touchdown	50
4.3.3 Final Approach and Touchdown	52
5 67P/Churyumov–Gerasimenko Surface Magnetization	55
5.1 Observations	56
5.1.1 Sensor Offsets and Lander Residual Field	56
5.1.2 Contact Velocities	57
5.1.3 Magnetic Field Observations	58

Contents

5.2	Magnetization	61
5.3	Magnetic Field in the Solar Nebula	62
6	Surface Compressive Strength	65
6.1	Comet Formation Scenarios	65
6.2	Philae as Impact Probe	67
6.2.1	Compressive Strength	71
6.3	Constraints on Comet Formation	75
7	Summary and Outlook	79
	Bibliography	81
	Danksagung	99
