

CONTENTS

1	INTRODUCTION	1
1.1	Motivation	1
1.2	Aim of the thesis	3
1.3	Structure of the thesis	4
2	STATE OF THE ART AND THEORY	7
2.1	Overview	7
2.2	Effect of electrical faults on synchronous machines	8
2.3	ROCOF in low inertia grids	9
2.4	Theoretical foundations	13
2.4.1	Electric power systems	13
2.4.2	Synchronous machines	18
2.4.3	Power flow analysis	21
2.4.4	Transient stability	22
2.4.5	ROCOF	24
2.4.6	Reduction of grid models for ROCOF studies	29
2.4.7	Mechanical effects of ROCOF events	36
3	METHODOLOGY FOR POWER GRID MODELING	41
3.1	Purpose dependent approach	41
3.2	Analytical grid reduction	42
3.3	Determination of initial ROCOF	43
3.4	Generation of ROCOF frequency curves	44
3.5	ROCOF studies with full or reduced grid models	44
3.6	ROCOF studies with frequency traces	45
3.7	Grid model for design cases	49
3.8	Deduction of methodology	52
4	METHODOLOGY FOR ELECTRICAL ROCOF STUDIES	55
4.1	Overview	55
4.2	Generator models for ROCOF studies	55
4.3	Evaluation of electrical output parameters	60
4.4	Protection system assessment	61
4.5	Control system and limiter assessment	66
4.6	Deduction of methodology	68
5	METHODOLOGY FOR MECHANICAL ROCOF STUDIES	71
5.1	Overview	71
5.2	Geometrical and material data	72
5.3	Shaft train assessment	73

5.4	Turbine blade vibrations	76
5.5	Generator rotor end bell	79
5.6	Damper windings	81
5.7	Generator stator end windings	84
5.8	Generator casing foundations	84
5.9	Deduction of methodology	85
6	APPLICATION OF METHODOLOGIES	87
6.1	Overview	87
6.2	Power system models	88
6.2.1	Full grid model	88
6.2.2	Analytical grid reduction for fault generation	92
6.2.3	Further reduction possibilities	97
6.3	Evaluation of electrical ROCOF studies	99
6.3.1	Study cases	99
6.3.2	Oscillation of output values	101
6.3.3	Protection system assessment	109
6.3.4	Control system assessment	111
6.4	Evaluation of mechanical ROCOF studies	113
6.4.1	Benchmark of ROCOF cases against design cases	113
6.4.2	Shaft system assessment	115
6.4.3	Turbine blade vibrations	120
6.5	Most important results	124
7	CONCLUSION AND OUTLOOK	129
A	APPENDIX - MATHEMATICAL MACHINE REPRESENTATION	133
A.1	Deduction of machine equations	133
A.2	Park's transformation	135
A.3	Expanded Park theory	142
	BIBLIOGRAPHY	149
	CURRICULUM VITAE	155
