

# Table of Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Objectives . . . . .	4
<b>2</b>	<b>Fundamentals</b>	<b>5</b>
2.1	Microemulsions . . . . .	5
2.1.1	Phase Behaviour . . . . .	5
2.1.1.1	Binary Systems . . . . .	6
2.1.1.2	Ternary Systems . . . . .	7
2.1.1.3	The $T\gamma$ -Section . . . . .	8
2.1.1.4	The Optimal State . . . . .	10
2.1.1.5	Influence of Additives . . . . .	11
2.1.2	Microstructure . . . . .	15
2.1.2.1	The Amphiphilic Film . . . . .	15
2.1.2.2	Interfacial Tension . . . . .	17
2.1.2.3	Structural Evolution . . . . .	18
2.1.3	Surface Tension Measurements . . . . .	20
2.2	Fluorescence . . . . .	23
2.3	N-heterocyclic Carbenes . . . . .	25
2.3.1	Origin of the Breslow Intermediate . . . . .	27
2.4	N-heterocyclic Olefins . . . . .	29
<b>3</b>	<b>Tailor-made Efficient Surfactants</b>	<b>31</b>
3.1	Synthesis of Surfactants . . . . .	31
3.2	Intermolecular Interaction . . . . .	37
3.3	Phase Behaviour . . . . .	41
3.3.1	Sodium Alkyl Sulfates . . . . .	43
3.3.2	Sodium Alkyl Sulfonates . . . . .	48
3.3.3	Sodium Alkyl Benzene Sulfonates . . . . .	52

3.3.4	Sodium Alkyl Amino Naphthalene Sulfonates . . . . .	54
3.3.5	Sodium Alkyl Amino Benzene Sulfonates . . . . .	58
3.4	Incorporation in Eukaryotic Cells . . . . .	61
4	Carbene Catalysis in Microemulsions	65
5	Transition Metal Complexes of Breslow Intermediates	71
6	Conclusion	83
7	Experimental Section	87
7.1	General Experimental Conditions . . . . .	87
7.1.1	Analytical Methods . . . . .	87
7.1.2	Miscellaneous Methods . . . . .	89
7.2	Synthesis of Surfactants of Class NaC <sub>X,Y</sub> ANS . . . . .	92
7.2.1	Synthesis of 5-(octylamino)naphthalene-1-sulfonic acid ( <b>40</b> ) . . . . .	92
7.2.2	Modified synthesis for 5-(octylamino)naphthalene-1-sulfonic acid ( <b>40</b> ) . . . . .	93
7.2.3	Synthesis of 5-(methyloctylamino)naphthalene-1-sulfonic acid ( <b>44</b> ) . . . . .	95
7.2.4	Synthesis of sodium 5-(methyloctylamino)naphthalene-1-sulfonate ( <b>47</b> ) . . . . .	96
7.2.5	Synthesis of 5-(decylamino)naphthalene-1-sulfonic acid ( <b>41</b> ) . . . . .	98
7.2.6	Modified synthesis for 5-(decylamino)naphthalene-1-sulfonic acid ( <b>41</b> ) . . . . .	100
7.2.7	Synthesis of 5-(decylmethylamino)naphthalene-1-sulfonic acid ( <b>45</b> ) . . . . .	102
7.2.8	Synthesis of sodium 5-(decylmethylamino)naphthalene-1-sulfonate ( <b>48</b> ) . . . . .	103
7.2.9	Synthesis of 5-(dodecylamino)naphthalene-1-sulfonic acid ( <b>42</b> ) . . . . .	105
7.2.10	Modified synthesis for 5-(dodecylamino)naphthalene-1-sulfonic acid ( <b>42</b> ) . . . . .	107
7.2.11	Synthesis of 5-(dodecylmethylamino)naphthalene-1-sulfonic acid ( <b>46</b> ) . . . . .	109
7.2.12	Synthesis of sodium 5-(dodecylmethylamino)naphthalene-1-sulfonate ( <b>49</b> ) . . . . .	110
7.3	Synthesis of Surfactants of Class NaC <sub>X,Y</sub> ABS . . . . .	112
7.3.1	Synthesis of 4-(octylamino)benzenesulfonic acid ( <b>52</b> ) . . . . .	112

---

7.3.2	Synthesis of 4-(dioctylamino)benzenesulfonic acid ( <b>51</b> ) . . . . .	114
7.3.3	Synthesis of sodium 4-(dioctylamino)benzenesulfonate ( <b>53</b> ) . . . . .	115
7.4	Carbene Catalysis in Microemulsions . . . . .	117
7.4.1	Reaction of D-glucose ( <b>55</b> ) with BDT ( <b>59</b> ) . . . . .	117
7.5	Transition Metal Complexes of Breslow Intermediates . . . . .	117
7.5.1	Generation of the Breslow intermediate <b>66</b> . . . . .	117
7.5.2	Generation of the Breslow-type intermediate <b>73</b> . . . . .	118
7.5.3	Generation of the Breslow intermediate <b>81</b> . . . . .	119
7.5.4	Crystallization of the Breslow intermediate <b>81</b> . . . . .	121
7.5.5	Crystallization of the deprotonated Breslow intermediate <b>82</b> . . . . .	121
7.5.6	Synthesis of 1,3-bis-Dipp-2-(methoxymethylidene)-imidazolidine ( <b>87</b> ) . . . . .	122
7.5.7	Complexation of Breslow intermediate <b>66</b> with cobalt(II) chloride ( <b>67</b> ) . . . . .	123
7.5.8	Extended complexation of Breslow intermediate <b>66</b> with cobalt(II) chloride ( <b>67</b> ) . . . . .	124
7.5.9	Complexation of Breslow intermediate <b>66</b> with cobalt(II) thiocyanate ( <b>71</b> ) . . . . .	124
7.5.10	Complexation of Breslow-type intermediate <b>73</b> with cobalt(II) chloride ( <b>67</b> ) . . . . .	125
7.5.11	Complexation of Breslow-type intermediate <b>73</b> with dicobalt octacarbonyl ( <b>76</b> ) . . . . .	125
7.5.12	Complexation of SIPr ( <b>65</b> ) with dicobalt octacarbonyl ( <b>76</b> ) . . . . .	126
7.5.13	Complexation of SIPr ( <b>65</b> ) and paraformaldehyde ( <b>80</b> ) with dicobalt octacarbonyl ( <b>76</b> ) . . . . .	126
7.5.14	Complexation of SIPr ( <b>65</b> ) and pentafluorobenzaldehyde ( <b>83</b> ) with cobalt(II) iodide ( <b>84</b> ) . . . . .	127
7.5.15	Complexation of the <i>O</i> -methylated Breslow intermediate <b>87</b> with cobalt(II) iodide ( <b>84</b> ) . . . . .	127
7.5.16	Complexation of the <i>O</i> -methylated Breslow intermediate <b>87</b> with palladium(II) chloride ( <b>89</b> ) . . . . .	128
7.6	Crystallographic Data . . . . .	129
<b>Appendix A</b>	<b>Supplementary Data</b>	<b>147</b>
A.1	Complexation of BDT ( <b>59</b> ) with dicobalt octacarbonyl ( <b>76</b> ) . . . . .	147
A.2	Density Measurements . . . . .	149

---

Appendix B Symbols and Abbreviations	151
Appendix C List of References	157
Appendix D Erklärung an Eides statt	167
Appendix E Curriculum Vitae	169
