Table of Contents

List of Figures	vii
List of Tables	x
Acronyms	xii
A. Foundation.....	1
I. Introduction	2
I.1 Motivation.....	2
I.2 Research Agenda.....	3
I.3 Structure of the Dissertation	6
I.4 Research Context and Design.....	7
I.5 Contributions	10
II. Theoretical Background.....	13
II.1 Intelligence and Intelligent Agents	13
II.2 Machine Learning and Big Data Analytics	16
II.3 Computational Data Analytics in Information Systems Research.....	20
B. Developing and Validating a Design Theory for Complex Machine Learning Systems	25
I. Distributed Cognitive Expert Systems: Deriving Design Principles from Existing Theory	26
1 Study 1: Towards Distributed Cognitive Expert Systems	27
1.1 Introduction	28
1.2 Related Work.....	28
1.3 A Design Theory for Distributed Expert Systems.....	29
1.4 Conclusion	39
II. Distributed Cognitive Expert Systems in Action: Developing Specific Instantiations of Machine Learning Systems	40
1 Study 2: Distributed Cognitive Expert Systems in Cancer Data Analytics: A Decision Support System for Oral and Maxillofacial Surgery	41
1.1 Introduction	42
1.2 Background	43
1.3 Context and Data	46
1.4 Design of a Real-time Decision Support System	48
1.5 Results	55
1.6 Discussion of Findings.....	59

1.7	Implications	61
1.8	Limitations	63
1.9	Conclusion	64
2	Study 3: Advancing Recommendations on Two-Sided Platforms: A Machine Learning Approach to Context-Aware Profiling	65
2.1	Introduction	66
2.2	Background	68
2.3	Designing a Time-Series-Based Machine Learning Approach for Collaborative, Content-Based, and Context-Aware Recommendations	71
2.4	Evaluation	74
2.5	Limitations	81
2.6	Implications	82
3	Study 4: A Machine Learning Approach to the Efficiency-Comfort Trade-Off in Everyday-Life Automation – The Case of Autonomous Vehicles and Sharing Business Models	85
3.1	Introduction	86
3.2	Background	87
3.3	Research Setting	91
3.4	A Division-of-Labor Application for Resolving the Efficiency-Comfort Trade-Off in Autonomous Driving	93
3.5	Evaluation	97
3.6	Discussion	100
3.7	Appendix A: Data and Preprocessing	104
3.8	Appendix B: Tuning LSTM Hyperparameters	106
3.9	Appendix C: Evaluation of the Prediction Modules	111
3.10	Appendix D: Variables used for Personalization in Prior Studies	120
C.	Contributions	123
I.	Findings	124
I.1	Reflections on the Development of a Decision Support System for Cancer Treatments	124
I.2	Reflections on the Development of a Consumer-Centric Recommendation system for Two-Sided Platforms	125
I.3	Reflections on the Development of an Efficiency-Comfort Trade-Off System for Autonomous Vehicles	127
I.4	Synthesizing the Artifact Designs: Lessons Learned and Revisitation of the Division-of-Labor Framework	128
II.	Limitations and Implications	135
II.1	Limitations	135
II.2	Implications for Practice	137

II.3	Implications for Research	140
III.	Conclusion and Outlook	148
	References.....	151
	Appendix	xiii
