Table of Contents

Abstract	vii
Acknowledgements	ix
Abbreviations and Acronyms	xi
1 Introduction	1
1.1 Background and rationale	1
1.2 Objectives	4
1.3 Organization of succeeding chapters	5
2 Genetic Concepts	7
2.1 The genetic code	7
2.2 Mendelian principles	12
2.3 Hardy-Weinberg equilibrium	14
2.4 Genetic models	16
2.5 Analysis methods in genetic epidemiology	22
2.5.1 Segregation analysis	22
2.5.2 Linkage analysis	25
2.5.3 Association analysis	28
2.6 Epistasis	32
3 Transmission Disequilibrium Test (TDT)	41
3.1 History and description of the TDT	41
3.2 Derivation of the test statistic	43
3.3 Extensions and modifications of the test	46
3.4 Quantitative Transmission Disequilibrium Test (QTDT)	47
3.4.1 Prospective QTDTs	47
3.4.2 Retrospective QTDTs	58

3.5	Synthesis of the literature	66
4	Generalized Quantitative Transmission Disequilibrium Test (GQTDT)	69
4.1	Theoretical background	69
4.2	The GQTDT model	81
4.3	Model selection	82
4.4	Data layout for analysis	84
4.5	Testing for genetic main effects and epistatic effects	86
5	Simulation Studies	87
5.1	The simulation scheme	87
5.1.1	The simulation model	87
5.1.2	Creating the genotypes	90
5.1.3	Creating the genetic main effects (G_i and H_i)	91
5.1.4	Creating the epistatic effects (I_i)	93
5.1.5	Creating the covariates (E_{ji})	94
5.1.6	Creating the other environmental effects or residuals (ε_i)	95
5.1.7	Creating the quantitative traits (Y_i)	96
5.2	Statistical tests	102
5.3	Results	104
5.3.1	QTs without locus effect (QT_N)	104
5.3.2	QTs with single-locus effect (QT_L)	106
5.3.3	QTs with two-locus effect (QT_{LL})	110
5.3.4	QTs with two-locus effect and epistasis (QT_{LLI})	113
5.3.5	QTs with two-locus effect, epistasis and covariates (QT_{All})	118
5.4	Discussion	121
6	Applications	125
6.1	The FHS real dataset	125
6.1.1	Description and objectives	125
6.1.2	Analysis method	128
6.1.3	Results	131
6.1.4	Discussion	133
6.2	The FHS simulated dataset	135
6.2.1	Description and objectives	135

6.2.2	Analysis method	137
6.2.3	Results	140
6.2.4	Discussion	141
6.3	The LUCY dataset	143
6.3.1	Description and objectives	143
6.3.2	Analysis method	146
6.3.3	Results	147
6.3.4	Discussion	153
7	Summary and Outlook	157
	Appendix	161
	Notations	162
	GQTDT online documentation and programs	166
	References	167
	Index	181
	Author's Profile	185
