

Table of contents

Table of contents.....	I
Table of figures	III
Index of tables.....	IV
Table of abbreviations	V
1 Introduction.....	1
1.1 Fetal programming.....	1
1.2 Intrauterine growth restriction and fetal programming in farm animals.....	2
1.3 Programming and related endocrine metabolites and systems	4
1.3.1 The IGF-System	6
1.3.2 Leptin and its functions of a nutrient sensor	15
2 Objectives.....	19
3 Material and Methods	20
3.1 Animals and treatments	20
3.2 Sample collections and analyses	21
3.2.1 ELISA for IGF-1	22
3.2.2 ELISA for IGF-2	22
3.2.3 Western ligand blots for the IGF-binding proteins	22
3.2.4 Sandwich ELISA for IGF-1 receptor in liver.....	25
3.2.5 Competitive enzyme immunoassay for leptin	26
3.3 Statistical analyses	27
4 Results.....	28
4.1 IGF-1 in plasma	28
4.2 IGF-2 in plasma	30
4.3 IGFBPs in plasma.....	32
4.4 IGF-1 receptor in liver tissue	36
4.5 Leptin in plasma.....	37
4.6 Body composition at the postnatal days.....	39
4.7 Correlations	45
4.7.1 Correlations on each sampling day within the three different maternal feeding groups.....	45

4.7.2	Correlations within dpc 94, dpn 1, dpn 28 and dpn 188 irrespective of feeding group	46
4.7.3	Correlations over all days irrespective of feeding group	48
5	Discussion	49
5.1	Leptin.....	49
5.2	IGF-1 and -2	54
5.3	IGFBPs	58
5.4	IGF-1 receptor	63
5.5	Body composition at the postnatal days.....	64
5.6	Conclusion	67
6	Summary	69
7	Zusammenfassung	74
8	References	81
	Danksagung	96
