## Contents

1	1 Introduction and Background	Introduction and Background		
2	<ul> <li>2 Optical field model</li> <li>2.1 The traveling-wave equations</li> <li>2.2 Balance of radiative energy .</li> <li>2.3 Effective longitudinal-lateral</li> <li>2.4 Retrieval of real device chara</li> <li>2.5 Summary</li> </ul>	projected equations	9 9 12 13 16 18	
3	3 Carrier transport model		19 20	
	3.2 Reduction to effective diffus current	ion equation and models for the injection	23	
	3.2.1 Carrier transport in t 3.2.2 Models for the injecti	he active region	24 26	
	3.3 Summary		29	
4	4 Heat model		31	
	4.1 Basic equations		32	
	4.2 Approximate equations for t.	$\begin{array}{c} \text{ ae heat source density } \dots $	34	
	4.2.1 Treatment of spontan	eous emission	34	
	4.2.2 Impact of vanishing t	ongitudinal lateral approximate equations	34 37	
	4.3 Energy conservation	ongitudinai-iaterar approximate equations	40	
	4.4 Treatment of pulsed operation	n (no-heat-flow approximation)	42	
	4.4.1 Experimental validati	on	45	
	4.5 Treatment of continuous-way	e operation	46	
	4.6 Summary		49	
<b>5</b>	Power saturation under short pulse operation			
	5.1 Spatial hole burning, current	spreading,	50	
	two-photon absorption and g	an compression	52	
	5.3 Estimation of additional offe	over variations	- 56 - 56	
	5.4 Conclusions		$50 \\ 58$	
6	6 Factors influencing the lateral	field profile	61	
	6.1 Modulation instability induc	ed by Kerr nonlinearities	62	
	6.1.1 Bespalov Talanov mo	dulation instability	62	

		6.1.2	Instabilities induced by the optical material Kerr effect		63		
		6.1.3	Instabilities induced by spatial hole burning		65		
		6.1.4	Conclusions		68		
	6.2	Multi-	mode lasing		69		
	6.3	3 Nonthermal effects			73		
		6.3.1	Nonthermal far-field blooming		74		
		6.3.2	Differential index $(\alpha_{\rm H}$ -factor)		76		
		6.3.3	Lateral carrier distribution in the active region		79		
		6.3.4	Conclusions		82		
	6.4	Therm	nal waveguiding effects		83		
		6.4.1	Short-pulse operation		83		
		6.4.2	Continuous-wave operation		87		
		6.4.3	Conclusions		92		
7	Imr	novom	port of the lateral brightness		02
