

Table of contents

1	Introduction	1
2	Theoretical background	3
2.1	Plasmonic nanoparticles	3
2.1.1	Synthesis and functionalization	3
2.1.2	Plasmonic nanoparticle properties and applications	7
2.2	Formation of nanoparticle superlattices	9
2.2.1	Self-assembly with organic ligands	9
2.2.2	Assembly with DNA molecules	12
2.3	Protein containers as a new building block	17
2.3.1	The ferritin protein container	19
2.3.2	Organization of ferritin into highly ordered structures	22
3	Basis for the present work	27
3.1	Supercharging of the protein container ferritin	27
3.2	Nanoparticle synthesis	28
3.3	Self-assembly	29
4	Concept of the work	31
5	Results	33
5.1	Encapsulation of plasmonic nanoparticles	33
5.1.1	Gold nanoparticle cargo	34
5.1.1.1	Gold nanoparticle synthesis	35
5.1.1.2	Functionalization and characterization	38
5.1.1.3	Stability of the gold nanoparticles	48
5.1.2	Silver nanoparticle cargo	51
5.1.2.1	Silver nanoparticle synthesis	51
5.1.2.2	Functionalization and stability test	53
5.1.3	Dis- and reassembly of the protein container	56
5.1.3.1	Dis- and reassembly of Ftn ^(pos)	57
5.1.3.2	Dis- and reassembly of Ftn ^(neg)	60
5.1.4	AuNP encapsulation	65
5.1.4.1	Influence of the ligand shell	65
5.1.4.2	Influence of the ionic strength	69

5.1.4.3 Purification and optimization	71
5.1.4.3.1 Purification of AuFtn ^(pos)	72
5.1.4.3.2 Purification of AuFtn ^(neg)	75
5.1.5 AgNP encapsulation	79
5.1.5.1 Encapsulation in Ftn ^(pos)	79
5.1.5.2 Encapsulation in Ftn ^(neg)	80
5.2 Encapsulation of dye molecules	82
5.3 Synthesis of metal oxide nanoparticles <i>in situ</i>	85
5.4 Assembly of the building blocks	87
5.4.1 Batch crystallization	88
5.4.2 Formation of nanoparticle superlattices	91
5.5 Potential applications of the nanomaterial	97
5.5.1 Optical properties	97
5.5.2 Catalytic activity	101
6 Summary and perspective.....	109
7 Experimental Part	113
7.1 General	113
7.2 Chemicals	113
7.3 E-coli strains.....	113
7.4 Used buffers.....	114
7.5 Analytics.....	114
7.5.1 Transmission electron microscopy	114
7.5.2 Scanning electron microscopy.....	115
7.5.3 Dynamic light scattering	115
7.5.4 Zeta potential.....	115
7.5.5 Surface enhanced Raman spectroscopy.....	116
7.5.6 Atomic absorption spectroscopy.....	116
7.5.7 Nuclear magnetic resonance spectroscopy.....	116
7.5.8 UV-Vis spectroscopy	116
7.5.9 Optical microscopy	117
7.5.10 X-ray diffraction	117
7.5.11 Small angle X-ray scattering.....	117
7.5.12 Thermogravimetric analysis.....	118
7.5.13 Circular dichroism spectroscopy.....	120

7.5.14 Density functional theory calculations.....	120
7.5.15 Magnetic characterization.....	120
7.6 Production and purification of the ferritin variants	121
7.6.1 Positively charged protein container.....	121
7.6.2 Negatively charged protein container	122
7.7 Nanoparticle synthesis in the protein container.....	122
7.7.1 Synthesis of CeO ₂ nanoparticles	122
7.7.2 Synthesis of FeO _x nanoparticles.....	123
7.8 Gold nanoparticle synthesis and functionalization.....	124
7.8.1 Leff synthesis	124
7.8.2 Peng synthesis	124
7.8.3 Calculation of gold nanoparticle concentration	125
7.8.4 Ligand exchange	125
7.9 Silver nanoparticle synthesis.....	126
7.9.1 Yamamoto synthesis	126
7.9.2 Hyeon synthesis	126
7.9.3 Ligand exchange	127
7.10 Nanoparticle stability tests	127
7.11 Dis- and reassembly	127
7.12 Encapsulation of plasmonic nanoparticles	128
7.13 Encapsulation of dyes	128
7.13.1 Rhodamine 6G in Ftn ^(pos)	128
7.13.2 Rhodamine B in Ftn ^(neg)	129
7.13.3 Determination of the dye loading.....	129
7.14 Catalysis with metal oxide nanoparticles in solution.....	129
7.14.1 Oxidase-like and peroxidase-like activity.....	129
7.14.2 Kinetic analysis.....	130
7.15 Kinetic measurements of the AuNPs in solution.....	130
7.16 Protein Crystallography.....	131
7.16.1 Hanging drop vapor diffusion.....	131
7.16.2 Batch crystallization.....	131
7.16.3 Stabilization of crystals	131
7.16.4 Catalytic activity.....	132

8	Appendix	133
9	Bibliography	153
10	List of abbreviations	171
11	List of chemicals	175
12	List of Figures	181
13	List of Tables	185
	Acknowledgment - Danksagung	187
	Curriculum Vitae	189
