# Contents

<b>Glossary</b>	<b>III</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	2
1.2 Objective and outline . . . . .	3
<b>2 Basic principles and state of the art</b>	<b>5</b>
2.1 Wood pellets as biomass fuel . . . . .	5
2.1.1 Production process . . . . .	7
2.1.2 Domestic delivery and storage procedure . . . . .	8
2.1.3 Pellet degradation and fines formation . . . . .	10
2.2 Basics of pneumatic conveying . . . . .	11
2.2.1 Types of pneumatic conveying systems . . . . .	11
2.2.2 Modes of flow through pipelines . . . . .	13
2.2.3 Conveying characteristics . . . . .	17
2.2.4 Bends in pneumatic conveying systems . . . . .	18
2.3 Experimental studies and numerical examinations . . . . .	21
2.3.1 Experiments on pressure drops and particle velocities . . . . .	21
2.3.2 Numerical investigations . . . . .	22
2.3.3 Flow through bends . . . . .	25
2.3.4 Particle degradation . . . . .	26
2.4 Demarcation of own thesis . . . . .	30
<b>3 Numerical methods</b>	<b>31</b>
3.1 Fluid phase modelling . . . . .	31
3.1.1 Governing equations . . . . .	31
3.1.2 Turbulence modelling . . . . .	33
3.2 Solid phase modelling . . . . .	34
3.2.1 Governing equations . . . . .	34
3.2.2 Contact forces . . . . .	35
3.2.3 Particle shape . . . . .	38
3.2.4 Neighbour and contact detection . . . . .	39
3.2.5 Coordinate systems and particle orientation . . . . .	41
3.3 Modelling of particle-fluid interaction . . . . .	43
3.3.1 Particle-fluid interaction . . . . .	43

3.3.2	Determination of porosity . . . . .	49
3.3.3	Coupling implementation . . . . .	50
<b>4</b>	<b>Single particle degradation analysis</b>	<b>53</b>
4.1	Experimental setup . . . . .	53
4.2	Materials . . . . .	56
4.3	Development of empirical model . . . . .	57
4.3.1	Selection function . . . . .	57
4.3.2	Breakage function . . . . .	60
4.4	Numerical investigation . . . . .	66
4.4.1	Implementation in DEM . . . . .	66
4.4.2	Verification . . . . .	71
<b>5</b>	<b>Experimental and numerical setup for pneumatic conveying analysis</b>	<b>73</b>
5.1	Experimental setup . . . . .	73
5.1.1	Optical length measuring system . . . . .	73
5.1.2	Pneumatic conveying test facility . . . . .	79
5.2	Numerical setup . . . . .	84
5.2.1	Domain and simulation parameters . . . . .	84
5.2.2	Verification of the numerical models . . . . .	87
5.2.2.1	Solid phase interactions . . . . .	88
5.2.2.2	Settling behaviour of single particles . . . . .	89
<b>6</b>	<b>Conveying behaviour and particle degradation analysis</b>	<b>95</b>
6.1	Overview of investigated conditions . . . . .	95
6.2	Dependencies among key flow features . . . . .	96
6.3	Conveying behaviour . . . . .	97
6.3.1	Influence of operating conditions . . . . .	97
6.3.2	Dependence on shape of pipe components . . . . .	107
6.4	Particle degradation . . . . .	111
6.4.1	Assumptions and simplifications . . . . .	112
6.4.2	Influence of operating conditions . . . . .	112
6.4.3	Dependence on shape of pipe components . . . . .	122
<b>7</b>	<b>Summary and outlook</b>	<b>129</b>
7.1	Summary . . . . .	129
7.2	Outlook . . . . .	132
	<b>List of Figures</b>	<b>135</b>
	<b>List of Tables</b>	<b>139</b>
	<b>Bibliography</b>	<b>141</b>
