Contents

Abstract	I
Zusammenfassung	II
Abbreviations	IV
Contents	VII
1. Introductions	1
1.1. Claudins as structural and functional components of tight junctions	1
1.1.1. Structure and classes of Claudins	2
1.1.2. Claudins in tight junction strand formation	5
1.1.3. Tight junction assembly and epithelial cell polarity factors	6
1.1.4. Claudins and embryonic barriers	8
1.2. Zebrafish brain ventricular expansion	11
1.2.1. Steps of initial zebrafish brain ventricular expansion	11
1.2.2. The role and the secretion of cerebrospinal fluid in brain ventricular expansion	12
1.2.3. The role of neuroepithelium in brain ventricle formation	14
1.3. Vasculogenesis of the zebrafish dorsal aorta and cardinal vein	15
1.3.1. Morphogenesis of the zebrafish dorsal aorta and the cardinal vein	15
1.3.2. Regulation of arterial-venous specification	17
2. Aims of this study	22
3. Materials and Methods	23
3.1. Materials	23
3.1.1. Fish lines and husbandry	23
3.1.2. Antibodies, dyes, enzymes, chemicals and kits	23
3.1.3. Media, buffers and solutions	25
3.1.4. Important chemicals	26
3.1.5. Consumables and equipments	26
3.1.6. Soft wares	27
3.2. Molecular biology methods	28

3.2.1. Sense mRNA synthesis	28
3.2.2. Synthesis of antisense RNA probes	30
3.2.3. Site direct mutagenesis cloning	31
3.3. Animal experiments	31
3.3.1. Generation of injection needles and chambers	31
3.3.2. Morpholino antisense oligonucleotide design and preparation	31
3.3.3. Embryo injection	32
3.3.4. Zebrafish imaging and brain ventricle injection	32
3.3.5. Sodium green indicator and ouabain incubation of fish embryo	33
3.4. Histology	33
3.4.1. Vibratom sectioning and immunohistochemistry	33
3.4.2. Whole-mount <i>in situ</i> hybridization	35
3.4.3. Plastic section	36
3.4.4. EM analysis	37
3.5. Sequence analysis and phylogenetic analysis	37
4. Results	39
4.1. Identification of zebrafish Claudin5 orthologues	39
4.1.1. Identification of two zebrafish <i>claudin5</i> genes	39
4.1.2. Zebrafish <i>claudin5a</i> is expressed within the brain during ventricular lumen expansion	40
4.2. Claudin5a is essential for zebrafish brain ventricular lumen expansion	42
4.2.1. <i>claudin5a</i> can be specifically knocked-down	42
4.2.2. Loss of Claudin5a does not affect the tight junction scaffold of the neuroepithelium	44
4.2.3. Loss of Claudin5a disrupts the neuroepithelial-ventricular paracellular barrier function	44
4.2.4. Loss of Claudin5a affects brain ventricular lumen expansion at 20 hpf	48
4.2.5. Loss of Claudin5a does not increase apoptotic cell death or impair proliferation rates	50
4.2.6. Loss of Claudin5a affects brain ventricular lumen expansion at later stage ...	51
4.2.7. Claudin5a localization depends on neuroepithelial tissue integrity	53

4.3. Claudin5a and Claudin5b are essential for zebrafish vasculogenesis	56
4.3.1. Claudin5a and Claudin5b are both expressed within endothelial vessels	56
4.3.2. Loss of Claudin5a and Claudin5b affects the separation of dorsal aorta and posterior cardinal vein	58
4.3.3. The vasculogenesis defect caused by loss of Claudin5a and Claudin5b can be rescued by either Claudin5a or Claudin5a ^{Y148A}	59
4.3.4. Loss of Claudin5a/b does not alter tight junction formation between endothelial cells	60
4.3.5. Loss of Claudin5a/b does not affect arterial versus venous differentiation	63
5. Discussion	67
5.1. Claudin5a tightens the neuroepithelial-ventricular barrier during zebrafish brain ventricular expansion	67
5.2. Na⁺,K⁺-ATPase and Claudin5a contribute to brain ventricle expansion via separate pathways	69
5.3. The role of Claudin5s in zebrafish vasculogenesis	72
