A deep ultraviolet laser light source
by frequency doubling of GaN based
external cavity diode laser radiation

Contents

1	Introduction	1
2	Fundamentals for frequency doubling with GaN based laser diodes	7
2.1	Nonlinear optics	8
2.1.1	Second harmonic generation	9
2.2	Nonlinear materials for deep ultraviolet light generation	12
2.3	Birefringent phase matching in BBO	14
2.3.1	Angle tuning	16
2.3.2	Phase matching tolerances	18
2.4	Second harmonic generation with focused Gaussian beams	20
3	Characterization of the applied laser diode	23
3.1	Working principle of laser diodes and vertical layer structure	24
3.2	Longitudinal modes	26
3.3	Optical gain and threshold condition	27
3.4	Electro-optical characteristics	28
3.5	Spectral emission characteristics	29
3.6	Spatial emission characteristics	31
3.7	Implications for the development of a deep ultraviolet laser light source	35
4	External cavity diode lasers as pump sources for DUV generation	37
4.1	Wavelength stabilization by external optical feedback	37
4.1.1	ECDLs with surface diffraction gratings	40
4.2	Macroscopic external cavity diode laser in Littrow configuration	44
4.2.1	Experimental Setup	45
4.2.2	Electro-optical characteristics	48
4.2.3	Spectral emission characteristics	51
4.2.4	Wavelength tuning	54
4.2.5	Spatial emission characteristics	55
4.3	Volume-Bragg-Grating stabilized external cavity diode laser module (μ ECDL)	56
4.3.1	Working principle of volume Bragg gratings	57
4.3.2	Concept and development of the μ ECDL module	60
4.3.3	Electro-optical characteristics	64
4.3.4	Spectral emission characteristics	65
4.3.5	Temporal stability of the μ ECDL emission	68
4.3.6	Spatial emission characteristics	69
4.4	Summary	70
5	Compact deep ultraviolet laser light source	71
5.1	Proof-of-concept setup with macroscopic ECDL as pump source	72
5.1.1	Detection of deep ultraviolet light	74
5.1.2	Investigation of conversion efficiency and phase matching tolerances	76

5.2	Micro-integrated ECDL module as pump source	85
5.2.1	Compact deep ultraviolet laser light source	85
5.2.2	Optimization of the focusing conditions	87
6	Conclusion and Outlook	93
A	Datasheet information for laser diode PL TB450B (Osram Opto Semi- conductors GmbH)	97
	Bibliography	99
