Table of Contents

Preface i
Abstract v
Table of Contents vii
List of Figures x
List of Tables xii
List of Abbreviations xiv

A. Foundations 1
I. Introduction 2
I.1 Motivation 2
I.2 Research Gap and Research Questions 5
I.3 Structure of the Dissertation 8
I.4 Research Positioning 10
I.5 Research Design 15
I.6 Anticipated Contributions and Implications 17
II. Research Background 19
II.1 Smart and Sustainable Mobility 20
II.2 Decision Support Systems 23
II.3 Big Data, Machine Learning, and Artificial Intelligence 24
III. Related Work 26

B. Studies on Data-Enabled Operational Decision Making 31
I. Assessing the Status Quo 32
1. Study 1: Archetypes of Carsharing Relocation Algorithms: A Perspective on Problem Space, Solution Space, and Evaluation 33
1.1 Introduction 34
1.2 Research Background 35
1.3 Research Approach 37
1.4 Results 40
1.5 Discussion 50
1.6 Conclusion 51

II. Designing a Development Environment for Operational Modes 53
1. Study 2: CASSI: Designing a Simulation Environment for Vehicle Relocation in Carsharing..... 54
1.1 Introduction 55
1.2 Related Work 56
1.3 Research Approach 59
1.4 Results 63
1.5 Discussion 73
1.6 Conclusion 76
1.7 Appendix: CASSI's System Definition Interfaces 77
III. Modeling Spatiotemporal Demand 79
1. Study 3: Increasing the Business Value of Free-Floating Carsharing Fleets By Applying Machine Learning-based Relocations 80
1.1 Introduction 81
1.2 Literature Review 82
1.3 Research Approach 85
1.4 Results 87
1.5 Evaluation 91
1.6 Discussion 92
1.7 Conclusion 94
2. Study 4: "Now You Can See Me!" – Unconstraining Demand for Effective Service Operation: The Case of Vehicle Relocation in Free-Floating Carsharing 96
2.1 Introduction 97
2.2 Literature Review 98
2.3 Research Approach and Results 101
2.4 Discussion 111
2.5 Conclusion 114
3. Study 5: How Far are You Gonna Go? Understanding Pedestrian Catchment Areas in Shared Mobility Systems 116
3.1 Introduction 117
3.2 Utilitarian Theory in Discrete Choice Modeling 118

3.3 Hypothesis Development 119
3.4 Methodology 121
3.5 Results 126
3.6 Discussion of Results and Future Research 132
3.7 Conclusion 137
3.8 Acknowledgements 137

C. Contributions 139
I. Findings and Results 140
I.1 Findings for the Status Quo of Vehicle Relocation Algorithms 140
I.2 Findings for Decision Support of Operational Modes 143
I.3 Findings for the Spatiotemporal Demand Model 145
II. Design Theory 152
III. Implications for Research, Practice, and Society 156
IV. Concluding Remarks 160
IV.1 Limitations and Future Research Opportunities 160
IV.2 Conclusion 162
References 165
Appendix xvii
Appendix A. Overview of the Author's Individual Study Contribution xviii
Appendix B. Overview of Further Published Studies xix
Appendix C. Curriculum Vitae xx
