Table of contents

1. Introduction	1
1.1. Adipose tissue.....	1
1.2. Energy balance and related genes.....	3
1.2.1. Free fatty acid receptors regulate energy homeostasis.....	6
1.2.2. Adiponectin and its receptors.....	10
1.2.3. IL-6 as an inflammatory cytokine	13
1.2.4. PPAR γ 2 a key regulator of adipogenesis	16
1.2.5. C/EBP α and its transcriptional effect.....	17
1.2.6. SREBP1 and its effect on PPAR γ	18
1.2.7. IRS-1 and GLUT4 and their relation with insulin sensitivity	20
2. Manuscript 1	
Putative reference genes for gene expression studies in propionate and β-hydroxybutyrate treated bovine adipose tissue explants	24
3. Manuscript 2	
Expression analysis of key genes related to nutrient sensing and insulin sensitivity in bovine white adipose tissue explants from subcutaneous and visceral depots stimulated with propionate or β-hydroxybutyrate and in differentiating bovine preadipocytes	38
4. Conclusions	59
5. Summary	61
6. Zusammenfassung	64
7. References	67
