# Contents

Plenary speeches	7
<b>1. Crops and cropping systems</b>	
a) Crop production and management	17
b) Pest, diseases and control options	69
c) Soil and plant nutrition management	93
d) Abiotic stress	119
<b>2. Landscape and land use</b>	
a) Optimisation strategies, synergies and trade-offs between sustainability, productivity and profit in farming systems	137
b) Sustainable land use, food systems, and commodity chains in regions of climate vulnerability, deforestation, and conflict	165
c) Agricultural landscape and land use change	183
<b>3. Climate change</b>	
a) Climate change, agriculture and adaptation	217
b) Resilience and adaptation to climate change	247
<b>4. (Agro)forestry and (agro)biodiversity</b>	
a) Agrobiodiversity and (agro)forestry to transform food systems	281
b) Management and biodiversity in agroforestry and tree systems	311
c) Biodiversity data as key to conservation of natural resources	343
<b>5. Animals and livestock systems</b>	
a) The role of livestock production systems in food systems transformation	353
b) Livestock and income, livelihoods and resilience	405
<b>6. Knowledge systems</b>	
a) Knowledge systems and digitalisation	429
<b>7. Food chains, food processing and consumers</b>	
a) Agrifood markets and value chains	459
b) Food processing, food quality and food safety	489

<b>8. Food and nutrition security</b>	
a) Food system diversification for food security	527
b) Food environment and consumer behaviour for improved nutrition and health	555
<b>9. Public policies, governance and institutions</b>	
a) Governance and (bio)economic aspects of food systems transformation	583
<b>10. Social justice and gender</b>	
a) Gender and intersectional perspectives in transforming food systems	613
b) How to foster inclusive food systems? Approaches to assessing social vulnerability and foster social equity	641
<b>11. Social learning</b>	
a) Social learning and knowledge systems: Understanding and integrating multiple actor perspectives to foster food systems transformation	665
b) Social dynamics of food systems transformation	693
<b>12. Energy-water-food nexus</b>	
a) Renewable energy and circular economy in the frame of water-food-energy nexus	721
<b>13. Institutions</b>	
a) Advancing a demand-driven research portfolio to improve water, land and food systems in the Global South (CGIAR/Systems Transformation Action Area)	747
b) Research cooperation for sustainable development (BMBF/DLR session)	757
c) Payments for ecosystem services: Win-Win solutions? (BMZ/GIZ session)	759
d) Leveraging human rights-based action towards equitable food systems: A panel discussion (BMEL/BLE session)	761
e) Seeds of change	763
f) DAAD Alumni seminar	769
g) International partner projects - University of Applied Sciences Weihenstephan Triesdorf	797
