

Table of Contents

Summary.....	1
List of Figures.....	3
List of abbreviations	4
Author contributions	5
Chapter 1: Introduction and overview	7
1.1 The nuclear pore complex and the nuclear basket.....	7
1.2 NB scaffold protein TPR and its known interactors	12
1.3 Protein ZC3HC1 and its reported functions.....	16
1.4 Starting point for this project.....	18
1.5 ZC3HC1 is an NB protein in a state of reciprocal dependence with TPR	19
1.6 ZC3HC1 is the second structural element of the NB	22
1.7 Pml39p is the evolutionary conserved homologue of ZC3HC1 in budding yeast	24
Chapter 2: ZC3HC1 is a novel inherent component of the nuclear basket, resident in a state of reciprocal dependence with TPR	28
Chapter 3: ZC3HC1 is a structural element of the nuclear basket effecting interlinkage of TPR polypeptides	212
Chapter 4: Nuclear basket protein ZC3HC1 and its yeast homolog Pml39p feature an evolutionary conserved bimodular construction essential for initial binding to NPC-anchored homologs of scaffold protein TPR	286
Chapter 5: Discussion	508
References.....	514
Acknowledgements	523
