
Table of contents

1.	Introduction	17
2.	Literature research.....	21
2.1.	Sovereign digitalisation, or digital sovereignty of the state	21
2.1.1.	Sovereignty as the basis of state action.....	21
2.1.2.	Sovereignty in the modern constitutional state	23
2.1.3.	Modern government thinking and action.....	25
2.1.4.	Sovereignty as an instrument for economic self-determination.....	27
2.1.5.	Measurability of state sovereignty; secondary data	28
2.1.6.	Summary of literature review; the aspects of state sovereignty.....	32
2.2.	Technologisation and the role of the state	33
2.2.1.	Analogue revolution on the eve of digitalisation.....	33
2.2.2.	Electronic revolution through central technology innovation.....	43
2.2.3.	The internet as a basis for decentralisation	46
2.2.4.	Decentralisation and mobilisation	49
2.2.5.	Industrial revolutions and quantitative characteristics.....	55
2.2.6.	Digitalisation in numbers; secondary data	69
2.2.7.	Summary of literature review; the aspects of digitalisation	90
2.3.	Digital Sovereignty ≠ Digitalisation + Sovereignty.....	91
2.3.1.	Digital sovereignty in the sense of sovereignty in cyberspace.....	92
2.3.2.	Concept of data sovereignty.....	93
2.3.3.	Technological sovereignty and key enabling technologies.....	95
2.4.	Assignment to economic theories.....	101
2.5.	Research gap	105
3.	Objectives	107
4.	Methodology	109

4.1.	Research design.....	109
4.1.1.	Qualitative definition of the term digital sovereignty.....	109
4.1.2.	Quantifying digital sovereignty.....	109
4.1.3.	Index formation.....	110
4.1.4.	Recommendations for strengthening digital sovereignty.....	110
4.1.5.	Summary of the method selection.....	110
4.2.	Structured interviews; qualitative research.....	111
4.3.	Index development.....	112
4.4.	Quantitative analysis: model bases.....	114
4.5.	Selection of secondary data.....	116
4.6.	Replacement methods for missing data.....	118
4.7.	Normalisation methods.....	120
4.8.	Appropriate weighting methods.....	122
4.9.	Index aggregation methods.....	124
4.10.	Methods of index and parameter analysis.....	126
4.11.	Methods of uncertainty/sensitivity analysis.....	126
4.12.	Verification and validation.....	128
5.	Empirical analysis and results.....	131
5.1.	Qualitative definition of digital sovereignty in the European context.....	131
5.2.	Results of interviews.....	133
5.3.	From quality to quantity: theoretical framework.....	135
5.3.1.	Sub-indices.....	135
5.3.2.	Sub-components.....	136
5.4.	Secondary data as a calculation basis for the sub-components.....	138
5.4.1.	State sovereignty.....	139
5.4.2.	Focus on key enabling technologies.....	140

5.4.3. Technological sovereignty	144
5.5. Summary of the data.....	146
5.6. Analysis of the data	148
5.6.1. Descriptive statistics.....	148
5.6.2. Measures of determination and p-values	150
5.7. Replacement of missing data	153
5.8. Normalisation.....	154
5.9. Weightings	155
5.9.1. Equal weighting.....	156
5.9.2. Principal Component Analysis	156
5.9.3. Analytic hierarchy process	159
5.9.4. Weighting number of parameters.....	161
5.10. Aggregation	162
5.11. Index formation DSI.....	163
5.12. Index validation, uncertainty and sensitivity analysis.....	164
5.13. Calculation of the DSI	168
5.14. Verification through simulation	171
5.14.1. 'Stress test' DSI.....	171
5.14.2. Simulation in 150 periods	172
5.15. Verification and validation through existing country indices	174
5.15.1. DSI Correlation to FSI, HPI, EPI, BLI and EFI.....	175
5.15.2. DSI correlation to sustainability indices	179
5.15.3. DSI Correlation to the Digital Dependence Index	180
5.15.4. DSI Correlation to the European Sovereignty Index.....	182
5.15.5. DSI Correlation to the NCSI.....	184
5.16. Analysis of individual states and clustering	185

5.16.1. Category I states – potential challengers	188
5.16.2. Category II states – observing differentiations	190
5.16.3. Category III states – top performer	192
5.17. Overarching view	198
6. Recommendations	205
6.1. Fields of Actions at individual state-level/individual analysis.....	205
6.2. Fields of Actions at individual state-level/group analysis	208
6.2.1. States with historically high independence	209
6.2.2. States with historically dependency, medium level of prosperity.....	210
6.2.3. States with historically high dependency	212
6.3. Optimum: joint initiative at EU-level	213
7. Discussion	215
7.1. Concept of digital sovereignty	215
7.2. Measurability of digital sovereignty	217
7.3. Comparison with other existing indices.....	219
7.4. Derivation of (political) recommendations	220
7.5. Limitations of the theoretical model	223
7.5.1. Focusing coefficient of determination	223
7.5.2. Model assumptions linear regression	224
7.5.3. Parameter selection	224
7.5.4. Imputation procedure.....	225
7.5.5. Democratic biased ‘DNA’ and parameter standardisation.....	226
7.5.6. Evaluation according to territorial criteria.....	227
8. Conclusions.....	229
References.....	235
Appendix.....	263

Questionnaire, long form.....	263
Questions and answer patterns of the interviewees.....	263
Answers in the structured interviews.....	264
DSI score and ranks.....	273
Scatter plot X_i	274
Measures of determination X_i Mean and kNN imputation.....	275
