Contents

Abstract.....	i
Acknowledgments.....	ii
Contents.....	iii
Nomenclature	vi
1 Introduction.....	1
1.1 General description of manufacturing sequence	2
1.2 Motivation.....	8
1.3 Outline.....	9
2 Fundamentals of numerical simulations	10
2.1 Flowsheet simulations.....	10
2.2 DEM-BPM simulations	11
3 Models development and numerical background	13
3.1 Implement models for macroscale flowsheet simulation	13
3.1.1 Wet milling	13
3.1.2 Spray drying.....	14
3.1.3 Storage.....	17
3.1.4 Pressing.....	18
3.1.5 Drying.....	19
3.1.6 Sintering.....	20
3.2 Energy consumption modelling	20
3.2.1 Spray drying.....	22
3.2.2 Drying	23
3.2.3 Firing.....	25
3.3 Numerical background of DEM-BPM simulations for compaction	27
3.3.1 Granules generation.....	28
3.3.2 Particle-particle contact model.....	30
3.3.3 Bond model.....	32

3.4	Numerical background of DEM-BPM simulations for heat transfer analysis	35
3.4.1	External heat transfer	35
3.4.2	Particle-wall heat transfer	37
3.4.3	Particle-particle heat transfer	37
3.4.4	Bond heat transfer.....	39
4	Material and methods	40
4.1	Macroscale flowsheet simulation.....	40
4.2	Uniaxial compaction experimentation methodology.....	43
4.3	Experimental investigation of heat transfer analysis in particle beds.....	45
4.3.1	Literature experiments for validation of validated heat transfer DEM models.....	45
4.3.2	Developed experimental setup for heat transfer analysis on spray dried porcelain particles bed.....	51
5	Optimization methodology	55
5.1	Case studies 1 & 2.....	56
5.2	Case study 3.....	58
5.3	Case study 4.....	61
6	Validation of macroscale flowsheet simulation	65
6.1	Sensitivity analysis.....	68
6.1.1	Milling time variation.....	68
6.1.2	Pressure variations in pressing.....	71
6.1.3	Time and temperature variation during sintering.....	72
6.2	Summary	74
7	Energy consumption validation	75
7.1	Electrical energy consumption validation.....	75
7.2	Thermal energy consumption validation.....	78
7.3	Summary	79
8	Optimization case studies	80
8.1	Case study 1 and 2.....	80
8.1.1	Case study 1.....	80
8.1.2	Case study 2.....	81
8.1.3	Optimization algorithm efficiency for case study 1 and case study 2.....	83
8.2	Case study 3.....	97
8.2.1	Influence on processing sequence parameters.....	97
8.2.2	Economic impact	100

8.3	Case study 4.....	103
8.4	Summary	113
9	DEM-BPM simulations for improved correlations of compaction stages.....	118
9.1	Correlation between bond properties and final porosity.....	122
9.2	Summary	124
10	Investigation of heat transfer analysis of packed beds	126
10.1	Validation of the DEM-BPM heat transfer models	126
10.2	Heat transfer analysis during storage on silos	133
10.3	Summary	142
11	Conclusions.....	144
12	References.....	148
	Appendix A	160
	Appendix B	161
	Appendix C	163
	Appendix D.....	165
	Appendix E.....	167
	Appendix F.....	169
	Appendix G.....	172
	Appendix H.....	173
