1	Introduction	1
1.1	From causation to causality	1
1.2	Domain knowledge integration	5
1.3	Probabilistic graphical models	7
1.4	Variational inference	8
1.5	Challenges	9
1.6	Contributions of this thesis	11
1.6.1	Data-driven net ecosystem exchange partitioning .	11
1.6.2	Anomaly attribution using counterfactual reasoning	12
1.6.3	Causal link estimation under hidden confounding .	13
2	Theoretical prerequisites	15
2.1	Fundamental concepts and definitions	15
2.1.1	Autoregressive models and Granger causality . . .	18
2.2	Knockoffs	22
2.2.1	Feature selection	22
2.2.2	Model-X Knockoffs	23
2.2.3	Second-order model-X Knockoffs	24
2.3	Causal models	25
2.3.1	Structural causal models	25

- 2.3.2 Interventions 27
- 2.3.3 Identifiability and hidden confounding 30
- 2.3.4 *do*-calculus and counterfactuals 33
- 2.4 Artificial neural networks 35
 - 2.4.1 Deep learning 36
 - 2.4.2 Optimization 39
 - 2.4.3 Recurrent neural networks 41
 - 2.4.4 Autoencoders 43
- 2.5 Deep graphical models 44
 - 2.5.1 Variational autoencoder 44
 - 2.5.2 Causal effect variational autoencoder 46
- 2.6 Time series analysis and forecasting 49
 - 2.6.1 Probabilistic forecasting 51
 - 2.6.2 Causal discovery and inference 52
- 2.7 Time series anomaly detection 55
 - 2.7.1 Types of anomaly detection methods 56
- 2.8 Time series anomaly attribution 57
- 2.9 Model identification 58
 - 2.9.1 Linear-Gaussian state space model 59
 - 2.9.2 Deep state space model DeepState 60

3 A Deep State Space Model for Partitioning Net Ecosystem

- Exchange 63**
- 3.1 Introduction and motivation 63
- 3.2 Related work 65
 - 3.2.1 NEE partitioning methods 65
 - 3.2.2 Time series forecasting using deep learning 68
- 3.3 Partitioning NEE using a DeepState 70
 - 3.3.1 Learning a time-dependent model of R_{eco} at night 72
 - 3.3.2 Forecasting daytime R_{eco} 72

4	Experiments for Partitioning Net Ecosystem Exchange	75
4.1	FLUXNET dataset	75
4.2	Learning a dynamical model of nighttime R_{eco}	79
4.2.1	Experimental setup	79
4.2.2	Selecting the best predictors	82
4.2.3	Comparative analysis	84
4.3	Evaluation of daytime R_{eco} forecasts	86
4.4	Obtaining GPP	89
5	Time Series Anomaly Attribution using Counterfactual Reasoning	91
5.1	Introduction and motivation	91
5.1.1	Extreme climate events	93
5.2	Related work	95
5.2.1	XAI for time series	95
5.2.2	General time series attribution methods	96
5.2.3	Attribution of extreme events	98
5.3	Detecting anomalous intervals	99
5.4	Counterfactual interval replacement	101
5.4.1	Methodology	102
5.4.2	Data imputation	106
6	Experiments for Anomaly Attribution using Counterfactual Reasoning	109
6.1	Datasets	109
6.1.1	ERA5-Land	109
6.1.2	Hurricanes dataset	111
6.1.3	ExtremeWeather dataset	111
6.2	Experimental setup and results	112
6.2.1	Heatwave attribution results	113
6.2.2	Drought attribution results	119

6.2.3	Hurricanes attribution results	128
6.2.4	Spatiotemporal attribution of extreme events . . .	130
7	Nonlinear Causal Link Estimation under Hidden Confounding	135
7.1	Introduction and motivation	135
7.2	Related work	138
7.2.1	Treatment effect estimation	138
7.2.2	Time series causality under hidden confounding . .	139
7.2.3	Causality-based time series anomaly detection . . .	141
7.3	Proposed methods	143
7.3.1	CEVAE for continuous intervention variable	143
7.3.2	Sequential CEVAE	147
8	Experiments for Causal Link Estimation under Hidden Confounding	157
8.1	Datasets	157
8.1.1	Synthetic dataset I	157
8.1.2	Synthetic dataset II	160
8.1.3	Semi-synthetic dataset of ecological time series . .	161
8.1.4	Aerosol-cloud-climate dataset	163
8.1.5	Fitness tracker dataset	164
8.2	CCEVAE experiments	165
8.2.1	Experimental setup	165
8.2.2	Results on Synthetic dataset I	167
8.2.3	Results on semi-synthetic dataset	171
8.2.4	Results of causality-based anomaly detection . . .	174
8.3	SCEVAE experiments	176
8.3.1	Experimental setup	176
8.3.2	Knockoff generation	177
8.3.3	Knockoff quality	179
8.3.4	Results on Synthetic dataset II	181

8.3.5	Results on aerosol-cloud-climate dataset	189
8.3.6	Results on FLUXNET dataset	191
8.3.7	Results on fitness tracker dataset	196
9	Conclusions	201
9.1	Summary and thesis contributions	201
9.2	Future work	205
A	Proof of Proposition 2.2.3	209
B	Additional attribution results	211
C	Causal link estimation	215
	Bibliography	217
	List of Own Publications	253
	List of Figures	255
