

# Contents

<b>Introduction</b>	<b>1</b>
<b>1 Matrix-Whisker Composite</b>	<b>5</b>
1.1 Model Material System . . . . .	5
1.2 Coordinate System . . . . .	7
1.3 Reason of Stresses . . . . .	9
<b>2 Mechanics of Elastic Solid Continuum</b>	<b>13</b>
2.1 Cauchy's Equations . . . . .	13
2.2 Equilibrium Equations . . . . .	15
2.3 Hooke's Law . . . . .	17
2.4 System of Differential Equations . . . . .	18
2.5 Energy Analysis . . . . .	21
2.6 Mathematical Boundary Conditions . . . . .	21
2.6.1 Cylindrical Particle . . . . .	22
2.6.2 Cell Matrix . . . . .	23
2.6.3 Stresses $p_1, p_3$ . . . . .	27
2.7 Elastic Energy . . . . .	28
<b>3 Mathematical Model 1</b>	<b>35</b>
3.1 Mathematical Procedure . . . . .	35
3.2 Cylindrical Particle . . . . .	36
3.3 Cell Matrix . . . . .	38
3.3.1 Intervals $r \in \langle 0, R_p \rangle, x_3 \in \langle L/2, d/2 \rangle$ . . . . .	38
3.3.2 Intervals $r \in \langle R_p, r_s \rangle, x_3 \in \langle 0, L/2 \rangle$ . . . . .	38
3.3.3 Intervals $r \in \langle R_p, r_s \rangle, x_3 \in \langle L/2, d/2 \rangle$ . . . . .	40
3.3.4 Radial Stress $p_1$ . . . . .	42

<b>4</b>	<b>Mathematical Model 1</b>	<b>43</b>
4.1	Mathematical Procedure . . . . .	43
4.2	Cylindrical Particle . . . . .	44
4.3	Cell Matrix . . . . .	45
4.3.1	Intervals $r \in \langle 0, R_p \rangle, x_3 \in \langle L/2, d/2 \rangle$ . . . . .	45
4.3.2	Intervals $r \in \langle R_p, r_s \rangle, x_3 \in \langle 0, L/2 \rangle$ . . . . .	45
4.3.3	Intervals $r \in \langle R_p, r_s \rangle, x_3 \in \langle L/2, d/2 \rangle$ . . . . .	48
<b>A</b>	<b>Selected Topics in Mathematics</b>	<b>53</b>
A.1	Cramer's Rule . . . . .	53
A.2	Determination of Integrals . . . . .	55
A.3	Wronskian's Method . . . . .	57
A.4	Numerical Determination . . . . .	59
